NOVELTIES

FLOWER SEEDS. 1885.

	EUCHARIDIUM BREWERI. (Page III.) PAPAVER CROCEUM FLORE PLENO. (Page	ш.)
941	ÆTHIONEMA GRANDIFLORUM. Handsome, hardy perennial, of a dwarf-spreading habit, blooms profusely from early in May to July, even in the hottest sun-exposed place, and forms splendid carpets of gay, rose-colored flowers	
942	ASTER DWARF QUEEN, PURE WHITE. A new dwarf variety of round globular habit of growth, and very double, finely imbricated snow-white flowers. Is, in fact, the best dwarf white aster yet introduced.	
943	ASTER BOSTON MARKET WHITE. This elegant variety is second to none in cultivation, either in habit of growth, form, or size. The splendid snow-white flowers are very double and produced in great abundance. Is especially recommended to florists and all who wish good white flowers for decoration.	
	ASTER NEW VICTORIA. Two splendid new varieties, both colors not yet existing in this class. The first named is more intense red than any other, and the latter a handsome light yellow	
944	Fiery Scarlet	.25
945	Sulphur Yellow	.25
946	CAMPANULA MEDIUM CALYCANTHEMA ALBA CÆRULEA STRIATA. New variety of Canterbury Bell, with double corolla. Flowers clear white, striped with blue, very	95

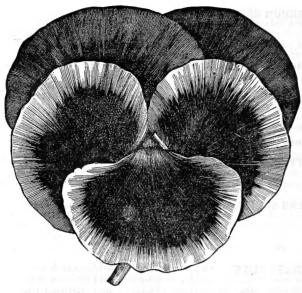

INCARVILLEA OLGÆ. (Page iii.)

IMPATIENS SULTANA. (Page iii.)

	PER P	TOTAL
947	CAMPANULA SIBERICA EXIMIA PURPUREA. New variety of this beautiful Campanula, with bright purple flowers. It comes true from seed, and is well adapted for mixed borders.	
948	CHRYSANTHEMUM CORONARIUM SULPHUREUM FLORE PLENO. A new and beautiful variety of this very popular annual, with large, double, light lemon-colored flowers. Will be found particularly useful for bouquets or for general decorative purposes	
949	CHRYSANTHEMUM SEGETUM GRANDIFLORUM. (WILLIAMS.) A large-flowered variety, with blooms of a bright-sulphur-yellow color, measuring 2 to $2\frac{1}{2}$ inches in diameter. Invaluable for cut flowers, as it comes into bloom when others are scarce	
950	CHRYSANTHEMUM TRICOLOR ECLIPSE. Very showy new variety, resembling in form of flower the well-known Chrysanthemum Burridgeanum, but surpassing it greatly by its striking colors, which are pure golden-yellow with a bright purplish scarlet ring or ceutre on the ray florets, the disk being dark brown. Either for cut flowers or beds, this variety will be found a most valuable and attractive addition.	
951	COLEUS, NEW LARGE-LEAVED. This is a remarkable class of Coleus, not only on account of the great size of its leaves, but also as regards their elegant marking, which include all the shades of crimson, gold, scarlet, and variegated	
952	CYC! AMEN PERSICUM GIGANTEUM RUBRUM. (WILLIAMS.) A magnificent variety, undoubtedly one of the most charming ever introduced. The flowers are of the largest size, and are thrown up well above the foliage. The color is delicate rose, changing to bright crimson at the base, being a tint unrivalled, and never before acquired in this giant strain	
953	CYCLAMEN PERSICUM CRIMSON KING. (WILLIAMS.) This beautiful new variety belongs to the Persicum type, but it is a great advance and improvement in this type. It produces a profusion of flowers, which are brilliant crimson, deepening at the base to a very dark red. The foliage is also finely marked, and the plant of a compact habit of growth	.50
954	DAISY, NEW DOUBLE-QUILLED MIXED. In this new strain the petals of the flowers are rolled up very closely and regularly set so as to give the flower a most elegant and trim appearance; in fact, each of them is the nicest little pompon that can be seen. The flowers are produced in abundance and in a great variety of color	.25
955	DELPHIMUM SINENSIS GRANDIFLORA FLORE PLENO. A double form of the Chinese Larkspur, with large beautiful blue flowers, lasting considerably longer than the single-flowered variety; grows about two feet in height and perfectly hardy	.20
956	ESCHSCHOLTZIA MANDARIN ROSEA. The color of the expanded flowers of this new variety is a brilliant light rose-white; the lower side of the petals is of a deep rose, the flower-buds thus making a striking and pleasing contrast with the flowers. Excellent for bouquets.	.20

		- VT 188
957	EUCHARIDIUM BREWERI. New, rare and truly magnificent plant of dwarf spreading habit of growth and narrow lance-shaped foliage. The color of the flower is a handsome purplish rose, shading to white in the centre. It flowers very profusely, and is of the easiest culture.	
	(See cut, page i)	.25
958	HOLLYHOCK SUPERB DOUBLE. PRIZE STRAIN. We have the pleasure of offering seed of this choice strain, saved from none but very double flowers. The parties from which our seed was procured were awarded the first prize the past season by the Massachusetts Horticultural Society for the best collection of Double Hollyhocks. Can supply the following colors separate:—	
	Crimson, Rose, Dark Maroon, Salmon, Orange, Yellow. Each separate	.10
959	Collections of eight separate colors	
960	HONESTY NEW VARIEGATED. (LUNARIA BIENNIS VARIEGATA.) A highly effective hardy plant, whose ever pyramidal growth and violet-colored flowers, combined with white variegated foliage, render it available for numerous ornamental purposes.	
961	IMPATIENS SULTANA. A new perennial Balsam from Tropical Africa; of dwarf, compact habit of growth. The flowers, which are produced most profusely, are one inch in diameter, and of a beautiful crimson scarlet. As a greenhouse or window plant it is unsurpassed, as it continues in bloom nearly all the time. It can also be planted out with advantage during the summer. (See cut, page ii).	
962	INCARVILLEA OLGÆ. Hardy perennial with fine, bright-green foliage and beautiful spikes of rose-colored flowers, somewhat resembling those of Pentstemen hybridus. Blooms from July to late in autumn. (See cut, page ii)	
963	IRIS ROBINSONIANA. (THE WEDDING FLOWER OF LORD HOWES' ISLAND.) This giant species attains a height of six feet or more, with proportionately large sword-shaped leaves, and large pure white flowers marked with golden-yellow on outer petals. The flowers are four inches in diameter and produced in great abundance. Is one of the most beautiful Iris ever introduced.	
964	LATHYRUS SPLENDENS. Beautiful perennial species of Everlasting Pea from Southern California, with dark-red flowers and finely cut foliage. Perfectly hardy and very abundant	
	flowering	.25
965	LAYIA ELEGANS. A native of California, forming tufts one foot in height. The flowers are golden-yellow, bordered white with orange centre, and measure nearly two inches in diameter. The leaves and stem are covered with soft minute hairs, giving the whole plant a particular grayish appearance. Flowers from July to October.	
966	MONTBRETIA CROCOSMÆFLORA. This new and rare tuberous rooted plant is the result of a cross between Montbretia Pottsii and Crocosmia Aurea. It grows about two feet in height, with long light-green Gladiolus-like foliage and loose heads of handsome orange-scarlet flowers, which are produced in succession from July to September. Has proved hardy	
	with us with a slight protection	
967	MYOSOTIS ELEGANTISSIMA FOLIA VARIEGATA. This new Forget-me-not is of dwarf compact growth with beautiful white variegated foliage and bright sky-blue flowers. Is most useful for borders, carpet beddling, or culture in pots.	
968	PANSY TRIMARDEAU. An entirely distinct and beautiful new race, the flowers of which	
	are the largest of any known variety. Each flower is marked with three large blotches or spots, and the plants are of vigorous and compact growth. The seed we now offer was saved from finely formed flowers of the richest and most varied shades of color, and will doubtless give excellent results. (See cut, page iv)	
969	PAPAVER CROCEUM ALBUM. A new variety of this handsome dwarf perennial Poppy, with single pure-white flowers. Both this and the following variety are perfectly hardy and well adapted for rock-work or mixed borders.	.15
970	PAPAVER CROCEUM FLORE PLENO. This is a new double-flowered variety, with curiously undulated and crisped petals, varying in color from pale yellow to deep orange. (See cut, page i).	.25
971	PAPAVER MEPHISTO. New single-flowering Poppy. A sport from the famous Papaver	
	Danebrog. The color of the flowers is fiery scarlet, handsomely marked on each of the four	.15

PANSY TRIMARDEAU, NEW. (Page iii.)

	The second secon	******
	PAPAVER, CHINESE DOUBLE DWARF. Handsome variety from China, not exceeding eighteen inches in height, with very double well-formed flowers. Fine for planting in any situation. We offer the following distinct colors separate:—	
972	Pure White	.20
973	Cherry Red ·····	.20
974	PETUNIA FIMBRIATA DELICATA. Splendid new acquisition to the fringed class of large-flowered Petunias. The ground color of the flowers being white, while the throat, as well as the deeply fringed margin, are of a delicate rosy purple, forming thus a lovely contrast to the light ground.	
975	PHACELIA CAMPANULARIS. A new annual from California, resembling in habit the well-	
	known Whitlavia grandiflora, but having a much more spreading and bushy habit of growth, and is therefore more floriferous. The great attraction of the plant consists in its large and numerous flowers of the finest deep Gentian blue, rivalling that of Salvia patens	.20
976	POLEMONIUM FLAVUM. Handsome species of the popular perennial known as Jacob's Ladder, with Nankin yellow flowers. The habit of the plant is the same as Polemonium cæruleum, being also just as free flowering. Can be cultivated either as an annual or perennial.	.15
977	PRIMULA SINENSIS FIMBRIATA ALBA MAGNIFICA. (WILLIAMS.) This white Primula is of fine form and substance. The habit of the plant is exceedingly compact, with deeply indented leaves. The flowers measure two and one half inches in diameter, are pure white with a large bright-yellow eye, each petal being beautifully fringed, and borne in large trusses well above the foliage.	.50
978	PRIMULA SINENSIS FIMBRIATA CHISWICK RED. (WILLIAMS.) The most brilliant crimson Primula yet sent out. Its habit is as robust as Alba magnifica. The foliage is very finely cut and of deep green color.	.50
979	PRIMULA SINENSIS FIMBRIATA COCCINEA. (Williams.) This incomparable variety cannot be too highly recommended, both for the beauty of its flowers and continuous bloom. The flowers are of a beautiful brilliant scarlet, with a clear sulphur eye, finely fringed, and of the largest size.	.50
980	SALVIA BLUEBEARD. (WILLIAMS.) Very handsome hardy annual, growing about eighteen inches high, of free branching habit, with square stems and sage-like leaves. The spikes are furnished with a number of brilliant mauve-purple bracts, which give the plant a	,

purple, with a lower white lip. Is suitable for beds or borders, in which it is very effective.... .50

		_
	PER P	KT
981	SCHIZANTHUS PINNATUS ROSEUS. Charming new variety of this popular free-flowering hardy annual. The flowers are of a delicate pink, passing into white toward the centre, the upper petal bearing a large blood-red blotch	.2
982	SILENE PENDULA BONNETTI FLORE PLENO. Another new and elegant variety of Silene, with very double flesh-colored flowers, and bright, glossy green foliage, which withstands both heat and moisture, thus surpassing in every respect the old double-flowerd variety, with the rough grayish green leaves. Is one of the best plants for mix2d borders or bedding.	
	STOCK WILLIAMS SUPERB LARGE-FLOWERED TEN-WEEK. A new and fine strain of large-flowering Ten-Week Stocks, of pyramidal growth, and compact spikes of very	•••
983	double flowers. We offer the following three distinct colors separate:— White	.1
984	Blood Red ·····	
985	Royal Blue · · · · · · · · · · · · · · · · · · ·	.1
986	VERBENA NEW GOLD-LEAVED, SCARLET. An elegant and attractive new variety, with bright golden yellow foliage, and flowers of the purest scarlet, forming thus a beautiful contrast, and being admirably adapted for bedding purposes. It reproduces itself perfectly from seed	
F	LOWER SEEDS OF SPECIAL MERI	1
	LE LE LES LES LES LES LES LES LES LES LE	•
	AND OF	
	RECENT INTRODUCTION.	
	and the second s	
987	in general habit the well-known A. Umbellata, but more robust in growth. The flowers	
988	are deep lilac-purple in color, produced in clusters like the Verbena ARGERATUM, DUCHESS OF CONNAUGHT. (WILLIAMS.) The finest of all Ageratums; grows exceedingly dwarf, and literally covered with large conical heads of flowers of a bright lavender-blue (See cut, page vi)	
989		
990		
991	BALSAM, CARTER'S CHALLENGER PRIZE. One of the most magnificent strains of perfectly Double Balsam in cultivation, including all the best shades of color, mixed	.5
	ASTER PÆONY PERFECTION, EXTRA. We offer the following separate colors of this	
992		
994		
995	flowers of the purest white, and is exactly the same in habit of plant and form of flower as the varieties previously introduced of this class. The Dwarf Pæony Perfection Asters are in every	
996	way excellent, and should be more generally cultivated	.1
	ago was not long in becoming a general favorite, but this novelty promises to surpass even that in beauty, the petals being striped with a more intense shade of orange.	.1

997 CALENDULA OFFICINALIS METEOR. A splendid variety of the English Marigold, with large and beautifully imbricated extremely double-striped flowers, the colors being of a bright orange, on a pale straw-colored, almost white ground. Owing to these pure and brilliant colors, they produce a splendid effect in any situation, well adapted for bedding or pot culture. .05

AGERATUM, DUCHESS OF CONNAUGHT. (Page v.)

GAILLARDIA, LORENZIANA. (Page vii.)

000	PER P	KT.
998	CAMPANULA GARGANICA. Charming light blue bell-shaped flowers on trailing branches, about twelve inches in length. Is a splendid plant for hanging baskets or pot culture	.15
999	CAMPANULA MEDIUM STRIATA. The flowers of this new Canterbury Bell are white, curiously dotted and streaked with violet, giving the color a fresh and pleasing hue	.10
1000	CAMPANULA SPECULUM, DOUBLE. A new variety of the well-known Venus's Looking-glass, with double flowers, dwarf, compact growth, fine for bedding	.10
1001	CANDYTUFT, CARTER'S NEW CARMINE. This variety is of compact habit; the plants present one mass of vivid carmine when in flower; very distinct from all others	.10
1002	CARNATION DWARF EARLY-FLOWERING VIENNA. Quite distinct, blooming two weeks earlier than other varieties. Habit dwarf and robust	.15
1003	CHRYSANTHEMUM FRUTESCENS, WHITE PARIS DAISY. This is the "White Marguerite" of the Paris flower market, the cut flowers of which are now so popular among our florists during the winter months. The disk of the flower is yellow, surrounded by a ray of	
	pure white florets	.10
1004	Star of Gold. This is similar to the preceding, except in the color of the petals, which are of	
	a soft golden yellow	.15
1005	CINERARIA, WILLIAMS EXTRA CHOICE STRAIN. This superb strain of Cineraria is of dwarf branching habit, with robust constitution. The seed has been saved with special care, and is the production of extremely fine flowers of different shades of color	.50
1 006	CLEMATIS ERECTA SUPERBA. This is a new early-flowered variety of an old favorite, with pure white flowers.	.10
1007	COCKSCOMB, GLASGOW PRIZE. A very fine new dwarf variety, with dark leaves and crimson comb, quite distinct and constant; one of the most splendid strains	.10
1008	CONVOLVULUS MINOR, ROSE QUEEN. A charming novelty with rose-colored flowers, centre pure white, fringed with purple violet shaded off towards the throat into fine broad bands of golden yellow.	10
1009	CONVOLVULUS MINOR, KERMESINUS VIOLACEUS. A new and very brilliant variety of this popular annual, with crimson-violet flowers.	
10 10	CYCLAMEN PERSICUM GIGANTEUM. (WILLIAMS.) A very large-flowered and greatly improved form of this elegant class of plants. The leaves are beautifully marked, and the flowers, which are thrown well above the foliage, measure two inches in length. Mixed colors.	
1011	CORYDALIS CHRYSANTHA. A new and elegant hardy biennial species, grows about one foot in height, with long spikes of golden yellow flowers. It comes into bloom about the first	

	PER F	KT.
1012	DAHLIA COCCINEA. The single brilliant scarlet Dahlia, now becoming very popular in gardens. Is easily raised from seed, and flowers the same season sown	.10
	DAHLIA, NEW SINGLE-FLOWERED VARIETIES MIXED. The seed we offer comes from a large collection of named varieties.	
1014	DOUBLE DAISY, LONGFELLOW. This is a large-flowered, bright rose-colored variety. The plants are at once noticeable, owing to the length and stiffness of the flower-stalks, whereby the flowers are rendered more valuable for bouquets. Is easily raised and flowers early	
1015	DAISY, DOUBLE WHITE. A beautiful variety, with pure white flowers	.15
	DELPHINIUM, LEMOINE'S NEW FRENCH HYBRIDS, Extra Double Mixed. The seed we now offer of Double Perennial Larkspur is from an unrivalled collection which contained none but the finest varieties, and will produce at least eighty per cent of double flowers, including the most brilliant shades.	
1017	ESCHSCHOLTZIA, ROSE CARDINAL. A very distinct and beautiful new variety, with flowers of a rich, rosy carmine, extending to the inside as well as the outside of the petals	
1018	ERYSIMUM PULLCHELLUM. A dwarf, yellow-flowering, herbaceous plant, of such densely tufted growth as to hide the ground. Its great hardiness makes it suitable for any	
	situation	
1019	EXACUM AFFINE. New biennial species, forming small, compact bushes six inches high, and having dark-green ovate leaves and terminal clusters of violet-purple cyclamen-scented flowers. It may be cultivated as a greenhouse plant or as a half-hardy annual	
1020	GAILLARDIA PICTA, LORENZIANA. (New Double Gaillardia.) This is one of the most elegant and valuable annuals of recent introduction. Is well adapted for planting either singly or in groups, as the plants are covered with flowers from early in July until cut off by	
	frost. It will also prove valuable for pot culture. These qualities cannot fail to make it a universal fovorite. The colors offered (in mixtures) comprise golden yellow, orange, claret, and amaranth. (See cut page vi).	
1021	GLADIOLUS LEMOINEI. We offer seed of this fine hybrid variety, said to be perfectly hardy, and will no doubt originate an interesting new class of these very popular bulbous plants.	
1022	GLAUCIUM TRICOLOR. Very rich flowering species, fifteen to eighteen inches in height, with scarlet flowers. Each petal bears a black spot with yellow margin at its base. If sown in the open ground with Eschscholtzias it will form a beautiful contrast.	
1023	GNAPHALIUM LEONTOPODIUM. (EDELWEISS.) This is the true Edelweiss of the Alps, well known and much sought for by tourists. The flowers are pure white, star-shaped, and of a downy texture.	
1024	GODETIA, BIJOU. The lovely color of this valuable variety renders it very distinct from all others. Its flowers are of the finest white, with a bright rose-colored spot at the base of each petal. The plant is very dwarf, not exceeding five or six inches in height, and forms a dense bush twelve to fourteen inches in diameter.	
1025	GODETIA, LADY SATIN ROSE. A lovely variety. The flowers are of a beautiful deep rose-pink, the surface shining like satin. Is one of the most beautiful of all the varieties yet raised, and was awarded a first-class certificate by the Royal Horticultural Society	10
1026	GODETIA, SPOTTED CARPET. A charming variety of this popular plant, grows very dwarf, forming a curious carpet-like bush, and bearing myriads of exceedingly pretty flowers of a pure white ground with a bright carmine rose spot at the base of each petal	
1027	GOMPHRENA GLOBOSO, NANA COMPACTA. A dwarf and distinct form of the pretty Globe Amaranthus; of very compact growth, attaining only five inches in height by eight in diameter; the flowers are rich purple, same size as the old kinds	
1028	HELICHRYSUM, FIREBALL, DOUBLE CRIMSON. A new and very brilliant everlasting, with flowers of the richest crimson-maroon.	
1029	HELICHRYSUM LANATUM. An exceedingly dwarf, showy species, with silver leaves. The sulphur yellow umbel-shaped flower-head, with their long flower stems, will at any time replace the French Immortelles.	
1030	IBERIS PRUITI. This is a new and handsome species of perennial Candytuft, of very dwarf growth, being not only of great merit as one of the first spring flowers, but also by its elegant habit of forming dense, compact bushes, which are covered with snow-white flowers	
1031	IXIOLIRION PALASSI. A beautiful, new, hardy, bulbous-rooted plant from Asia Minor, grows one foot in height, with elegant rich purple flowers.	
1032	LAVATERA ARBOREA VARIEGATA. A very distinct and beautiful variety with variegated foliage. Fine for beds or mixed borders	.10
1033	LINARIA CYMBALLARIA. (COLISEUM IVY.) An elegant plant for hanging-pots or baskets.	.10

	PER P	ET.
1034	LOBELIA, PRIMA DONNA. Among Lobelias this has been pronounced a perfect gem. In habit it is very compact and dwarf, whilst the rich velvety crimson maroon flowers equal in size those of Lobelia Speciosa	.15
1035	LOBELIA, STAR OF ISCHL. A most beautiful variety with deep azure blue flowers. We recommend this Lobelia as one of the very best for bedding purposes	.10
10 36	LOBELIA, WHITE GEM. This is a charming white variety, grows close and compact, and is well adapted for bedding	.10
1037 1038	LOBELIA ERINUS KERMESINA. A handsome new variety with crimson flowers LOBELIA SYPHILITICA. A handsome hardy perennial species; grows one foot in height, with bright blue flowers	
1039	MARIGOLD, FRENCH COMPACT, GOLD STRIPED. An elegant variety, the result of many years' selection. The plants are very compact, attaining a height of about six inches and a diameter of about twelve inches; thickly studded with large flowers, striped with bright yellow and chestnut color, very uniform in growth, and one of the very best for bedding.	.10
1040	MESEMBRYANTHEMUM CORDIFOLIUM VARIEGATUM. One of the best variegated summer bedding plants in cultivation.	.15
1041	the state of the s	
1042	MUSA ENSETE. (THE GREAT ABYSSINIAN BANANA.) A splendid plant for the open air in summer, with magnificent long, broad, and massive foliage, producing a most striking effect when planted singly or in groups. Seedlings attain very large size the first year	.20
1043	MIGNONETTE MACHET. This variety is highly recommended, makes dwarf, vigorous plants, of compact growth, followed by numerous pyramidal spikes of red flowers	
1044	MYOSOTIS SYLVATICA COMPACTA AUREA. A new Forget-me-not, with bright golden yellow foliage, contrasting agreeably with the lively blue color of the flowers. It is of a yery dwarf and compact habit, and of great value for spring bedding	.10
1045	MYOSOTIS ALPESTRIS ROBUSTA GRANDIFLORA. The flowers of this new variety exceed in size any other Alpine Forget-me-nots. They are sky-blue in color, with a clear yellow eye.	-10
1046	MYOSOTIS SYLVATICA. (THE CLIVEDEN FORGET-ME-NOT.) A favorite species, with large deep-blue flowers. Highly recommended and much grown in English gardens	
1047	NASTURTIUM, TOM THUMB, EMPRESS OF INDIA. The plant is of dwarf, compact habit, with dark bluish-tinted foliage, and flowers of a brilliant fiery scarlet, many degrees deeper and finer than in King of Tom Thumbs	.10
1 048	NASTURTIUM, TOM THUMB, LADYBIRD. This handsome variety is of English origin, the result of many years' labor. The ground color is rich golden yellow, each petal barred with a broad yein of bright ruby crimson. Is a great addition to the Tom Thumb section.	
1049	NEMOPHILA ATOMARIA ATRO-CÆRULEA. A distinct and beautiful novelty, with large flowers of deep azure blue and white centre, encircled with a zone of black purple. The plants are dwarf and very free blooming, well adapted for either beds or pot-culture	
1050	NERTERA DEPRESSA. (THE CORAL PLANT.) A very pretty and attractive little Alpine plant for pot-culture, forming compact, cushion-like tufts covered with berries about the size of small coral beads, and of a brilliant coral color.	
1051	NICOTIANA AFFINIS. A very fine and highly remarkable species, attaining about twenty inches in height, and producing long, tubular-shaped, pure white flowers. They are in full beauty morning and evening, and emit a delicious fragrance. In this respect few flowers can compare with them.	.05
1052	OXALIS TROPÆOLOIDES (Corniculata). With handsome purplish brown foliage and small yellow flowers; grows very dwarf, only two inches in height, and is particularly well adapted for carpet bedding	.10
1053	PANSY, LORD BEACONSFIELD. The ground color of the flower of this elegant Pansy is purple-violet, shading off on the top petals only to a whitish hue, a peculiarity which lends to the whole flower an unusually bright appearance.	001E
1054	PANSY, SNOW QUEEN. The flowers of this charming sort differ entirely from the ordinary white Pansy. They are of a particularly delicate satiny white, with a slight tinge of yellow towards the centre. It reproduces itself exactly from seed	
1055	PAPAVER BRACTEATUM. Splendid hardy perennial; flowers large, bright orange-crimson, with black spot at base of each petal	

	PER P	KT.
1056	PAPAVER DANEBROG. A new single-flowering Poppy of striking effect. The flowers are of a brilliant scarlet color, bearing on each of the four petals a large white spot forming a white cross on scarlet ground similar to the Danish or Swiss national banner	.10
1057	PENTSTEMON HYBRIDUS GRANDIFLORUS. From a choice collection of mixed colors	.10
10 58	PETUNIA, CARTER'S EMPEROR. A magnificent class, including both single and double varieties. The colors are extremely varied, from the richest crimson to the most delicate rose; pure white, striped and blotched. The plants are of a dwarf, compact, yet vigorous habit	.50
1059	PETUNIA GRANDIFLORA, FIMBRIATA FLORE PLENO. This splendid novelty is the result of the most careful hybridization. Many plants among those from which the seed we offer was saved produced flowers rivalling in doubleness the double garden Poppies	.50
1060	PICOTEE, CARTER'S CHOICEST DOUBLE. From named varieties. Mixed colors	.25
1061	POPPY, VICTORIA CROSS. It is almost impossible to describe the brilliant beauty of this new variety of Poppy. The petals of the flower are of a rich vermilion crimson, each marked with pure white, representing a Maltese cross	.10
1062	PRIMULA ELATIOR DOUBLE. (Hose in Hose.) A new, very pretty, and interesting variety, with two flowers on the same stem, one inside the other; perfectly hardy, and comes true from seed	.25
1063	PRIMULA SINENSIS, WILLIAMS'S SUPERB STRAIN. We can with confidence offer this superb strain as being the finest in cultivation; it has been awarded first prizes wherever exhibited, and numerous testimonials to its superior qualities, in habit, color, and substance of flower, have been received from the most eminent gardeners and amateurs	.50
1064	PRIMULA SINENSIS, CARTER'S VESUVIUS. This magnificent variety is unquestionably the most brilliant-colored Primula in cultivation. The rich crimson-scarlet flowers are of immense size, elegantly fringed, and of great substance	.50
1065	SAPONARIA OCYMOIDES SPLENDENS. The flowers of this handsome variety are of a finer red, and the plants more compact than the old species. Hardy perennial	.10
1066	SCUTELLARIA MACRANTHA. Fine hardy herbaceous plant, about one foot in height, covered with long dark-green leaves and panicles of handsome purple Antirrhinum-shaped flowers	.15
1067	SEMPERVIVUM REGINÆ AMALIÆ. A new hardy Alpine species, forming handsome rosettes of dark-green leaves, tipped with purple; one of the best dwarf succulents for bedding	
1000	purposes	.15
1068	SILENE NANA COMPACTA ROSEA. Has bright rose-colored truly double flowers, is of remarkably good dwarf compact habit, very free flowering, and comes quite true from seed STATICE SUWOROWI. By far the finest of all annual Statices. Its branching spikes of	.10
1003	flowers are bright rose with a carmine shade, each plant producing from ten to fifteen spikes, measuring fifteen to eighteen inches in length and from one half to one inch in breadth. The foliage, lying flat on the ground, is comparatively small and completely hidden by the numerous	
1070	flower spikes	.10
	opening in long succession	.25
1071	SUNFLOWER, OSCAR WILDE, IMPROVED. The seed of this improved strain is of our own saving from plants selected for their fine form, habit of growth, and bright golden flowers	.05
1072	SWEET PEA, ADONIS. The color of the flower is a rich and beautiful carmine rose, slightly shaded with lighter and darker tints, entirely distinct from any other kind; very robust, and free blooming, and particularly sweet scented	.10
1073	TAGETES PUMILA, GOLDEN RING. This handsome new Marigold was selected from T. Pumila; color, rich orange; habit, shorter and more compact than its parent, flowers also more numerous. Is a really good golden-orange bedding plant	,05
1074	TAGETEA PATULA, NANA PULCHRA. (New Maricold.) A dwarf, free-blooming variety; flowers golden yellow, with a dark brown centre; very showy	
1075		
1076	ZINNIA, DOUBLE DWARF, MIXED. An elegant variety, of dwarf, compact habit, and	.1)

NEW AND SELECT VEGETABLE SEEDS.

1885.

BEANS.

GODDARD, OR BOSTON FAVORITE. We take pleasure in introducing this new and excellent variety, which we consider the best Dwarf Shell Bean now in cultivation. Will without doubt take the place of the old Dwarf Horticultural, which it somewhat resembles in its red marking, but the Beans are much longer and larger, the plant more erect, and much more productive than that variety. Is also a first-class Shell Bean, does not blight or spot, and all who have tried it, both market gardeners and other cultivators, pronounce it a most valuable introduction. Per quart, 40 cents; pint, by mail, 35 cents.	
IMPROVED ROUND POD RED VALENTINE. Many beans have been introduced, but none have been found that could take the place which the Red Valentine has held until now. This new variety is ten days earlier than the old, much more prolific, and still retains in greatest perfection all the points which have made the old Valentine so popular. Per quart, 40 cents; pint, by mail, 35 cents.	
NE PLUS ULTRA. A new very dwarf and compact variety, of most delicate flavor, very early, and remarkably productive; can be used either as a string or shell bean. Is one of the best for forcing under glass, or for first out-of-door planting. Per quart, 40 cents; pint, by mail, 35 cents	
PORTLAND FANCY. This is the earliest pole string bean in cultivation. Is very productive, being a mass of pods from the bottom of the poles to the top. Very tender, of excellent flavor, and entirely stringless until the beans are fully grown. The beauty of this variety is that as fast as the pods are picked new ones grow, and the poles are full of string beans until frost comes. Per quart, 30 cents; pint, by mail, 25 cents	
PROLIFIC TREE. This new pea bean grows to the height of 20 inches, branching out in all directions, and bearing the pods so high that they are not so apt as the common sort to touch the ground and be injured by wet weather. A single vine has yielded 130 pods. They closely resemble the Navy Bean, and have yielded over 50 bushels to the acre. Per quart, 40 cents; pint, by mail, 35 cts.	
KENTUCKY WONDER. The most productive variety we have ever grown of Running Beans. The vines climb the poles rapidly, and the remarkably long and succulent pods grow in clusters of three or four, covering the poles from top to bottom. It is not recommended as a shell bean, but as a string or snap bean it is as wonderful in fine quality as in its growth and productiveness. Per quart, 50 cents; pint, by mail, 40 cents.	
WONDER OF FRANCE. A new dwarf variety, of French origin, with long straight pods, very early, and very productive. The leaves drop just before the maturity of the pod; on this account the latter ripens very quickly, and the beans remain a beautiful green color, and maintain that fresh appearance even when cooked. Per quart, 40 cents; pint, by mail, 35 cents	
IVORY POD WAX. Another new dwarf variety, fully a week earlier than the Black Wax; is stringless, tender, and succulent, with transparent ivory white pods and of rich creamy flavor, and without doubt the most productive Wax Bean now grown, the vine being a perfect mat of pods the entire season. Per quart, 30 cents	
CRYSTAL WHITE WAX. A distinct variety of Dwarf Beans, with waxy, transparent pods; stringless, succulent, tender, and of the richest flavor. The pods are slow to harden, and retain their delicious tenderness on the bush for a long time. Per quart, 35 cents; by mail, 65 cents	

BEET.

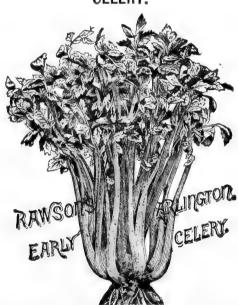

PE	R PKT.
CARTER'S PERFECTION. A new half-long variety, of medium size, rich crimson color, a splendid flavor; foliage shining and dark. Pronounced by the Royal Horticultural Society to perfection. Per ounce, 15 cents	be
MANGEL WURZEL, GOLDEN YELLOW TANKARD. A very valuable variety, of fine for of very sweet flavor and bright yellow in color. Very highly recommended, by those who grev last year, as the finest Mangel for dairy farming yet introduced. Per pound, 60 cents; by mail, cents; quarter pound, 25 cents; ounce, 10 cents.	v it , 75

CABBAGE.

- PEERLESS EARLY. This popular new variety nearly equals the Jersey Wakefield in earliness, but makes much larger heads, often weighing more than twelve pounds each. Is very round and uniform in shape, with few loose leaves, thus allowing them to be set out nearer together. It also has the very valuable quality of remaining, after fully matured, without cracking or bursting, much longer than any other variety. In a trial the past season with other leading kinds, the Peerless Early far surpassed all others in reliability of heading, nearly every plant forming a large solid head, where some varieties set at the same time were almost an entire failure. Per ounce, 80 cents. See cut.... 15

DANDELION.

CELERY.

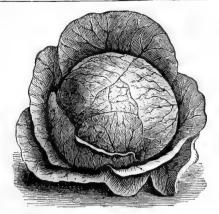

COPYRIGHT, 1884

RAWSON'S EARLY ARLINGTON. An improved variety of the Boston Market, being fully three weeks earlier, of much larger growth; does not blight as badly, or run to seed. We consider it the very best variety for early growing, as it bleaches very easily and more quickly than any other. We also especially recommend it to those who use only small quantities, and find trouble in growing other kinds. At the September exhibition of the Massachusetts Horticultural Society, this variety was awarded the first prize on both the regular and special premiums offered. Per ounce, \$1.00.

HENDERSON'S WHITE PLUME. The stalks and portions of its inner leaves and heart are white, so that by closing the stalks, either by tying them up with matting or by simply drawing the soil up against the plants, the work of blanching is completed. Is one of the best varieties. Per ounce, \$3.00	
LARGE GOLDEN YELLOW SOLID. This new variety has all the qualities of the dwarf large- ribbed sent out a few years ago, but is self-blanching to a very remarkable extent, the outer ribs even assuming, without any cover whatever, a yellowish-white color	
GOLDEN DWARF. A very distinct variety, which originated in New Jersey, where it is extensively grown for the New York market, and takes the lead of other sorts. When blanched, the heart, which is large and full, is of a waxy golden yellow, rendering it a most showy variety for the table or market. It is solid, and of most excellent flavor. Per ounce, 25 cents	
CORN, SWEET OR SUGAR.	.00
· · · · · · · · · · · · · · · · · · ·	
EXTRA EARLY ORANGE SWEET. This new variety combines in a remarkable degree not only earliness, but also large size and excellent quality. It is of an orange color, twelve-rowed, and a very vigorous grower, and will be found very superior from its delicious sweetness, its large-sized ears, coupled with its extreme earliness, and its productive qualities, many stalks producing from three to four ears. We think our customers will be satisfied, after trying this variety, that it is all that is claimed for it. Price per packet, 10 cents;	
per quart, 30 cents; per pint by mail, 30 cents.	
MARBLEHEAD, EXTRA EARLY. This has proved an excellent Sweet Corn; is of dwarf habit, sets its ears very low on the stalks; yields well, and is of good quality. Quart, 25 cents; pint, by mail, 25 cents.	
POTTER'S EXCELSIOR. In season medium between early and late. This is unquestionably the sweetest, tenderest, and richest-flavored table-corn in cultivation; of vigorous growth, bearing good-sized twelve-rowed ears; very productive, often three ears on a stalk, and keeps longer for use in its green condition than any other variety. Quart, 25 cents	
CUCUMBER.	
CARTER'S MODEL. This new English frame variety is described as the model of perfection in Cucumbers. It averages eighteen inches in length, perfect in outline, and of uniform diameter throughout; tender, and of the finest flavor; very prolific, and continues long in bearing. This splendid variety has taken first prizes wherever shown at the English horticultural exhibitions. No doubt, in our warmer climate, it will do well in open culture	
"BEST OF ALL." The largest, most prolific, and useful hardy out-door Cucumber. Grows sixteen to twenty inches long, very straight, with few seeds, and is extremely productive and excellent	
LETTUCE.	
NEW OAK-LEAVED. A distinct and new variety now offered for the first time, with leaves shaped like those of the oak, thus giving it a very unique and handsome appearance, which is retained during all stages of its growth. The leaves are light green, slightly curled, and set very close together, forming compact heads; is free from all bitter taste, very tender, and slow in running to seed. Is well adapted for forcing or open culture. (See cut, page xiii)	
BURPEE'S GOLDEN HEAD. Is described by all who had the opportunity of testing it the past season as a rapid-growing variety, producing firm and solid heads of very large size, crisp and brittle. As it does not wilt under severe heat, it remains in excellent condition for weeks, and for summer use is superior to nearly all other varieties of Cabbage Lettuce. One grower raised some heads that when pulled up filled a half-bushel measure	
HOVEY'S BLACK-SEEDED CABBAGE. Large, solid heads; one of the most splendid varieties in cultivation; first-class for market gardeners or family use	.15
STONE-HEAD, GOLDEN YELLOW. A new variety, with very solid heads; of superb quality and great beauty. It is quite as early as Tennisball, has larger heads, and is unsurpassed for table use. Per ounce, 40 cents.	
MANY TOT AUTHOR AS ACCUMENTALLY AND ALCOHOLOGICAL SECTION AND ASSESSMENT OF THE SECTION AND ACCUMENTS OF THE SECTION AND ACCUMENTS OF THE SECTION AND ACCUMENTS OF THE SECTION AND ACCUMENTS.	110

NEW OAK-LEAVED LETTUCE. (See page xii.)

PEERLESS EARLY CABBAGE. (See page xi)

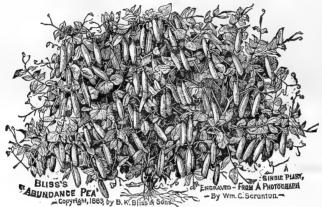

WELON, MUSK.	KT.
ORANGE CREAM. This new melon is globe-shaped and thickly netted, the netting often so dense that scarcely a pin's head can be put between the meshes. Weighs from two to three pounds each, and remarkably uniform both in shape and size. The flesh is very thick, of a beautiful deep salmon color, and of fine flavor even down to the skin	.25
GOLDEN GEM. A new extra early variety, nearly round, one and a half to two pounds in weight. Skin green, thickly netted with broad bands of green and gold between the lobes. The flesh is light green, very thick; the inner surface when cut open shows a beautiful golden color. Per ounce, 25 cents	.10
MONTREAL MARKET. This splendid Melon is extensively grown for the Montreal markets, where it is very highly esteemed. The fruit is of the largest size, nearly round, and deeply ribbed; skin green and netted, green-fleshed, very thick, sweet, and of delicious flavor. 25 cents per ounce.	
BANANA OR ROMAN CANTALOUPE. This new Melon differs from all other varieties in cultivation, especially in its form, which is banana-shaped, and from eighteen inches to two feet in length. Externally they are light yellow, entirely free from netting; the flesh is thick, of a bright orange color, and of superior quality. Per ounce, 25 cents	
HACKENSACK. Grows uniformly to a large size, round in shape, flattened at the ends; flesh green, and of most delicious flavor; productive and most popular market variety. Per ounce, 15 cents	.05
NETTED GEM. Entirely new, and a most valuable acquisition. Ripens earlier than any other, and uniformly of fine, luscious flavor; form round, and as solid as a cannon-ball; the flesh is light green, and very thick. Per ounce, 25 cents	
MELON, WATER.	
MAMMOTH IRON-CLAD. The largest-sized of any Watermelon, often weighing from fifty to seventy pounds each. Resembles the Gypsy in shape, but much more productive. The flesh is a beautiful bright red, firm, and never mealy; flavor sugary and delicious; ripens with the Cuban Queen. Is called Iron-Clad for the reason that they stand rough handling, this fact making them a valuable variety for shipping. Per ounce, 25 cents.	
PRIDE OF GEORGIA. Another new and excellent Watermelon, now offered for the first time. The color is dark green, nearly oval in shape, ridged like an orange, and grows partly upon its end. Is firm, and when well cultivated attains a large size. It is claimed for this variety that for crispness, sweetness, and flavor, it stands at the head of all Watermelons. Per ounce, 40 cents	
SCALY BARK. This fine variety was first exhibited at the Atlanta Exposition, where it attracted general attention, not only from its enormous size, but its peculiarly mottled skin, which, though smooth, bears the striking appearance of being covered with fish scales. The flesh is light crimson, tender, and of fine flavor. Per ounce, 25 cents	
EARLY CALIFORNIA, OR IMPROVED ODELLA. Rounded shape, light-green skin; very early, sweet, and fine-flavored; thin rind, but tough shell; grows readily to thirty-five pounds' weight; one of the best for market or shipping. Per ounce, 15 cents	
ICE RIND. Of round form, white-seeded; cannot be too highly praised on account of its solidity, thin rind, and rich, sugary flavor. Per ounce, 15 cents	
CUBAN QUEEN. This new Melon is remarkable for great productiveness, size, solidity, and crisp, sugary flesh; is quite early and of fine appearance. Per ounce, 10 cents	.05

ONION.

PER PET.

RED BASSANO, TRIPOLI. A new variety of this class of mid and deliciously flavored onions.

Like all the Tripoli onions, it grows to a large size, and should be sown early. Per ounce, 35 cents. .10

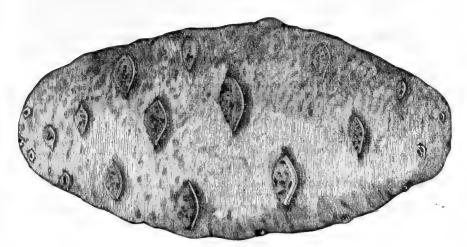

BLISS'S ABUNDANCE PEA.

PEAS.

- HOVEY'S FIRST AND BEST. We introduce this fine Pea as one of the very earliest in cultivation. Vine about two feet, of vigorous habit, bearing fine, long, uniform pods, and yielding immense crops, which come forward so uniformly as not to require more than two pickings to clear off the whole crop. This, with its extreme earliness, renders it the most profitable pea for early market purposes. Per quart, 3° cents; per peck, \$2.00.
- CARTER'S STRATAGEM. The extraordinary merits of this new green wrinkled Pea place it far ahead of any hitherto introduced. The vines grow to the height of about two feet, of a robust and branching habit, literally covered with immense pods, many nearly six inches long, crowded full of very large peas, of finest table quality. Awarded numerous first prizes in England last year. Per quart, 50 cents; per pint, by mail, 40 cents.

PER PKT.

NEW POTATO, THE ADVANCE.

This new and remarkable variety was raised by Mr. Albert Bresee, of Vermont. For many years Mr. Bresee's name has been made familiar throughout the country as the originator of the Early Rose, and other valuable sorts now in general cultivation; but this new variety, as its name denotes, is a great advance over any other, either new or old. The vine is a good grower, potatoes large and of uniform size; flesh white, flowery, and of the best quality when cooked. In a communication to the Committee on Vegetables of the Massachusetts Horticultural Society the past season, Mr. Bresee says: "In regard to the Advance, it originated from a seed-ball of the Early Rose, fertilized with the Climax by planting them in alternate hills with the Rose; have never found any seed-balls on the Early Rose, when planted alone. As to the time of ripening, some seasons the Advance ripens quite as early as the Rose, at others, a very few days later. Mr. Charles Downing writes me that the Advance is a little earlier and of much better quality than the Rose."

Mr. C. N. Brackett, of Newton, chairman of the Committee on Vegetables, of the above-named society, says, in his Annual Report:—

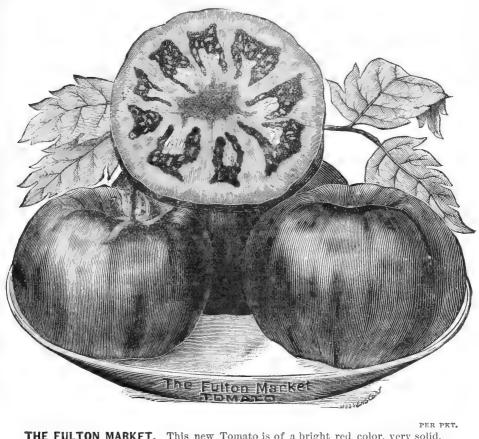

"Those who have grown the Advance Potato in this vicinity the past season all speak of it in terms of unqualified praise; and from my own experience, having grown it by way of trial, am free to say that I think it possesses merits of a high order, and feel satisfied that as soon as known it will take its place among our most popular varieties."

Mr. Fearing Burr, of Hingham, Mass. (author of Burr's Field and Garden Vegetalles of America), also says:—

"I have grown and used the Advance Potato, and fully coincide in every respect with the opinion expressed by Mr. Brackett as regards this new variety."

In regard to its productiveness it ranks number one, as all who have grown it can testify; was awarded a first prize at the Annual Exhibition of the Massachusetts Horticultural Society, where it attracted much attention. The above cut is an exact representation of this fine variety. Per peck, \$1.00; bushel, \$3.50.

POTATOES. PER	PK T ,
EXTRA EARLY SUNRISE. The earliest variety grown, producing potatoes fit for the table within sixty days from time of planting. The tubers are oblong, large, solid, uniform, and hand some; flesh white, fine-grained, and dry, cooking well even when first dug; very productive, and of fine keeping qualities. The twelve largest potatoes, in a crop grown from one pound in sixty-seven days, weighed 25 pounds 11 ounces. Price, 75 cents per peck; \$2.00 per bushel; \$5.00 per barrel.	- f
WHITE ELEPHANT. This fine late variety must become popular on account of its great productiveness, excellence of flavor, and good keeping qualities. The tubers are very large and solid growing closely together in the hills. Price, 50 cents per peck; \$1.50 per bushel; \$4.00 per barrel.	
CLARK'S No. 1. We again call attention to this popular and very early variety, which, after a number of years' trial, still continues to be one of the very best potatoes in cultivation, both as regards quality and productiveness, either for garden or farm crop. Price, 50 cents per peck; \$1.50 per bushel; \$4.00 per barrel.	3
PARSLEY.	
NEW PERPETUAL. A new variety, which seems to be perennial in duration, as it has stood upon the same spot four years before running to seed. Per ounce, 30 cents	
PEPPER.	
NEW GOLDEN DAWN MANGO. This new variety is similar in shape to the Mountain or Bell Pepper. Color, a bright golden yellow, very brilliant and handsome; but the quality which distingulables it from all others, its crowning point of excellence, is the fact that it is entirely exempt from any hot, fiery flavor. In productiveness it surpasses any variety we ever grew; single plants last season ripened from twelve to twenty-four of its fruit. Per ounce, 40 cents	i t
PUMPKIN.	
LARGE TOURS. Grows to an immense size, often weighing over one hundred pounds. Per ounce, 25 cents.	.10
RADISH.	
JAPAN RADISH. An esculent plant, of the radish tribe, but unlike that vegetable the pods are eaten instead of the roots. The plants bear a great quantity of very long and slender pods, which, when about half grown, are succulent and tender, of an agreeable flavor, and used the same as radishes; also when boiled esteemed a delicious vegetable.	ì
SQUASH.	
WHITE PINEAPPLE. A new and distinct fall and winter variety. The color of the skin is a pure creamy white. It ripens with the Perfect Gem, but can be used much sooner, as it is excellent when quite young. It keeps well for months; is a strong grower and very prolific, yielding five to eight perfect squashes to a vine. The flesh is very thick, of a creamy-white color, very fine-grained, and of the best quality. Per ounce, 30 cents	t t
RED CHINA. This new variety comes from China, as its name denotes. Is very productive, yielding from seven to thirteen perfect squashes to a plant, which weigh from three to five pounds each, and measure six to eight inches in diameter; are very solid, the meat being from one to two inches thick. The skin is of a vivid red, faintly striped with pale yellow; flesh rich orange color, fine-grained, sweet, and of excellent quality; is a strong grower; matures early, and keeps until spring. Per ounce, 30 cents.	, ,
PERFECT GEM. Equally valuable as a summer or winter variety, and entirely unlike any before offered. The squashes are from four to six inches in diameter. Flesh fine-grained, dry, very sweet, and of delicious flavor. Ripens early, and may be kept till spring. Per ounce, 15 cents	,
TOMATO.	
LIVINGSTON'S FAVORITE. This Tomato is sent out by Mr. Livingston, the originator of Paragon, Acme, and Perfection, who highly recommends it as the largest perfect-shaped Tomato in cultivation, smoother than Paragon, deeper red than Perfection; ripens evenly and early, holding its size to the end of the season; flesh solid, with few seeds, and remarkably productive; bears shipping long distances, and for canning purposes cannot be excelled. Per ounce, 30 cents	1 g 8
LIVINGSTON'S PERFECTION. This variety is one of the best; of the same form as Acme, but is larger, earlier, perfectly smooth, blood-red in color, with more flesh and fewer seeds. It is a heavy cropper, of uniform size, and a beautiful fruit. Per ounce, 25 cents	t y

THE FULTON MARKET. This new Tomato is of a bright red color, very solid, and of excellent flavor. Its form is somewhat similar to the Hathaway's Excelsior, smooth, solid, and of medium size; grows in clusters, and is very prolific. A peculiarity of the plant is its foliage, which is small, dark green, and curled. It is an extra early variety, good keeper, and well adapted for shipping. We especially recommend it to market gardeners and all others who wish a first-class Tomato.

TURNIP.

NEW WHITE TIGER FLOWER.

Tigridia pavonia alba.

This new and beautiful acquisition, raised from seed in France several years since, was introduced and bloomed by us last year. As the varieties of Tigridia we already possess are either scarlet or yellow, we watched the development of this new variety with more than ordinary interest; but when its first flowers burst into view, we were not only surprised, but delighted with their rare delicacy and great beauty. The flowers are pune white, with the centre or cup richly spotted with crimson and gold; they are also larger, and continue longer in perfection than T. pavonia or conchiflora.

Price, 20 cents each; \$2.00 per dozen.

CANNA EHREMANI.

This new and magnificent Canna is one of the greatest acquisitions. We have cultivated it extensively. It has large and handsome foliage, and the flowers, which are as large as a Lily, are of the deepest crimson color, produced on tall, showy spikes. It blooms freely all summer, and potted and placed in the greenhouse it continues to blossom during winter.

Price, 30 cents each.

HAMMOND'S SLUG SHOT.

A Most Valuable Insecticide, being Fatal to Insects in Every Form in which they are Injurious to Vegetation.

In substance this is an impalpable powder, destructive to the Potato Bug and all other insect life in the various stages of growth; at the same time the ill effects of Paris Green, or danger from having it around in quantities, are obviated. It has been used with success in destroying the small black fly so injurious to the turnip and cabbage crops; also in destroying Caterpillars and Worms on Currant bushes, Pear and Apple trees, Egg Plants, etc.

Slug Shot is put up in strong, neat packages, ready for use, of 5 and 10 lbs. each. Price in packages of 5 lbs., 30 cents; 10 lbs., 50 cents.

Tillinghast's Manual of Vegetable Plants.—A valuable work on growing early and late vegetables for market, forcing under glass and management of fire hot-beds, culture of Asparagus, Strawberries, etc. 25 cents.

Celery and Cabbage Raiser's Guide.—A thorough and practical treatise on growing and keeping Celery and Cabbage; how to destroy the Cabbage-Worm; how to keep other vegetables in winter; and making and management of hot-bed, etc. 25 cents.

How to Destroy Insects on Plants and Flowers.—This is an excellent book on a very important subject, and gives full directions for the destruction and prevention of all insects which infest both House, Green-house, and Garden Plants, Roses, Currants, Grape Vines, Cabbages, Fruit and Ornamental Trees, etc. Also, how to prepare special Fertilizers for Plants, Washes for Trees, and various other useful information. 30 cents.

GEEL'S COMPOUND,

For the Destruction of Greenhouse and Garden Insect Pests, Mealy Bug, Red Spider, Scale, Green Fly or Aphis, Thrips, Rose Slugs, Currant and Cabbage Worms, etc.

This Compound is an odorless chemical preparation, the result of years of study and experiment made directly upon the various insests which infest plants.

It is a dry, soluble composition, harmless to man, healthful to plants, but fatal to all insect pests. It combines neatness, cleanliness, convenience, dispatch and freedom from any poisonous qualities in handling, and has passed the ordeal of the most thorough trials. It is doubtless the cheapest preparation of any now offered for a similar purpose, one pound of the compound to thirty gallons of water forming a solution sufficiently powerful for the complete destruction of the generality of insects. Apply the solution with a common garden syringe.

Put up in half and one pound boxes; price 50 cts. and \$1.00 each per box. By mail, sixteen cents per pound extra.

The following testimonial from Superintendent Doogue, of the Department of Common and Squares

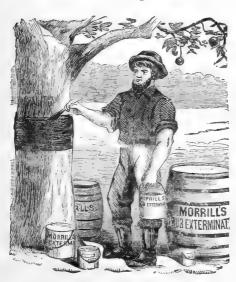

CITY HALL, BOSTON, Jan. 5, 1884.

Gentlemen,—I have caused the sample of "Geel's Compound" for the destruction of floral pests to be used about the Extensive City Greenhouses, and have noted with care the effects of the same. I find it efficient and convenient, and I feel fully justified in recommending it to public favor. Your obedient servant,
WILLIAM DOOGUE, Superintendent.

MORRILL'S

CANKER * WORM * EXTERMINATOR.

A Sure Protection for Fruit and Ornamental Trees from the Ravage of the Grub and Canker Worm.

We again call attention to this valuable Canker Worm Destroyer, which has proved successful wherever properly applied. This is easily done by first placing a band of tarred paper six inches in width securely fastened around the tree, four feet above the ground, then covering the paper thoroughly with the Exterminator, using a common paint

HARDY AND OTHER BULBS

FOR AUTUMN PLANTING.

In the Autumn we have an extensive assortment of Hardy Bulbs, which require to be planted during the months of October and November for early Spring Flowers in the garden; also, others for House and Greenhouse, and can fill orders for any of the following kinds at that season. Our stock is procured from the very best sources from Holland and clsewhere, and embraces the finest varieties of each class, which have been selected from a great number grown by ourselves for this special purpose, and on this account we recommend those we offer to average much finer bulbs and varieties than are usually offered in this country.

HOVEY & CO.'S ILLUSTRATED SEED CATALOGUE.

JANUARY, 1885.

TO PURCHASERS OF SEEDS.

On the return of another season, we have the pleasure to present our friends and customers with our Annual Catalogue and Price List of Seeds and Garden Requisites for 1885. Thankful for past favors and an increasing patronage, we shall endeavor to maintain the confidence of our customers and the public, in the reliable character of the seeds we sell, and trust to be favored with a continuance of their kind orders. Our prices, we hope, will generally be found satisfactory, all being quoted at as low rates as possible consistent with the general excellence of our stock.

Within a few years great improvements have been made in our Flowers and Vegetables by careful selections; and in revising our seed list we have excluded everything experience has proved to be undesirable, or which has been superseded by better and more profitable strains. Such new varieties as have gained a good reputation have been added, and we believe our Catalogue will be found to contain as complete a collection in all departments as can be offered.

As Specialties to which we give undivided attention, and which have made our choice seeds known to all lovers of flowers, we name the French and German Asters, Double Zinnias, Camellia Balsams, Double Hollyhocks, Double Portulacas, Double Sweet-Williams, Pansies, Verberas, Petunias, etc., and among greenhouse and hardy flowers, the Pelargonium, Geranium, Cineraria, Calceolaria, Lily, etc., all raised in our extensive collection, also imported from the best growers in Europe.

We also invite attention to our Collection of Flower Seeds, comprising all the most choice assortments to be found in Europe, selected expressly for us by the most successful cultivators in England, France, Germany, and Prussia, of an excellence unsurpassed, and which have heretofore given such universal satisfaction to our customers.

Of NOVELTIES, we pride ourselves upon being the first to possess everything new, rare, or choice, and only refer to our list as evidence of this.

It has not been our habit to enlarge upon our own success in the growth of the most beautiful flowers; but in the now prevailing custom of doing this, we embrace the opportunity to state that, during the last thirty years, we have been awarded upwards of three hundred first-class Prizes by the Massachusetts Horticultural Society. First prizes for German Asters, Double Zinnias, Verbenas, Petunias, Carnations, Sweet-Williams, Annuals, Phloxes, Herbaceous Plants, Cut Flowers, etc.; the Silver Medal for seedling Japan Lilies; and the Gold Medal for seedling Camellias. Also prizes for flowers and plants by the Cambridge Horticultural Society and the Rhode Island Horticultural Society. This, we trust, will show at least our interest in the culture of the finest flowers of all kinds.

To the department of Vegetable Seeds we invite your especial attention. It is, we believe, as complete a list of the best varieties for market or the family garden as ever offered.

Bulbs, Trees, Plants, etc., from our extensive Nurseries at Cambridge, carefully packed for all climates, and forwarded by express, or in any way directed by the purchaser.

Our Catalogue of Greenhouse, Bedding Plants, etc., sent to all applicants.

ADDRESS

HOVEY & CO., 16 South Market Street,
Boston.

JOHN C. HOVEY.

WILLIAM W. SIMONDS.

We have no connection with a seed firm in Chicago doing business under the

name of Hovey & Co.

Our only place of business in Boston is at No. 16 South Market Street, to which all Letters and Orders should be addressed.

SUGGESTIONS ON SOWING

Annual, Biennial, and Perennial Flower Seeds.

ANNUALS.

These have been called the "flowers for the million." The ease with which they are raised from seed; the little expense compared with bedding-plants; their adaptation to all kinds of soils; the little trouble they give the amateur; the rapidity with which they come into bloom, and the infinite number of forms as well as varieties of foliage,—all combine to render these plants the greatest treasures of the garden.

Who does not admire the glowing colors and rich mottling of the favorite Double Balsam, or the magnificent Double Aster, the Larkspurs, with their stately spikes of blue or white or crimson blossoms, the massiveness and splendor of the Double Zinnias, the feathery spikes of the Crimson Celosia, which sparkle in the sun, the flaunting colors of the Double Poppies, or the Double Portulacas, now resembling miniature roses? and where shall we find flowers that surpass in their delightful fragrance the Stock Gillies and Mignonette?

Among florists and gardeners, the term "Annual" is given to those plants which are sown in the spring, bloom and seed in the summer, and soon afterwards perish. A few are included among annuals like the Marvel of Peru, etc., because they flower the first year; but they are only annual as regards treatment. By cultivators they have been divided into three classes; viz., Hardy, Half-Hardy, and Tender Annuals.

HARDY ANNUALS.

These are so called because they do not require any artificial heat at any period of their growth, and are capable of enduring any ordinary weather from April to November; a frosty morning, not unusual in the former month, or even in May, doing them no injury if advanced beyond the seed-leaf. Many of them may be sown in autumn; and the young plants will make their appearance early in spring, and flower stronger than when it is deferred till April.

The Soil and its Preparation.—The best soil for annuals, and indeed for most flowering plants, whether biennials or perennials, is a light, rich loam, neither too sandy nor too stiff. In such they grow readily and attain great perfection; but it is hardly necessary to say that few persons have just such a soil. They must take such soil as they have, and by the application of proper manures or sand or clay, bring it to such a condition as to answer all the purposes of a flower-garden.

Those who wish to make the garden a specialty will consult something more than a catalogue. Our hints are intended for the mass of the people who love flowers, who have but little leisure, and do not wish to incur great expense in the gratification of their taste.

Period for Sowing.—This must depend much upon the season. Our Northern springs are so variable that no definite period can be named. As a general rule, the time to commence sowing is about the middle of April, though a few sorts may be planted as soon as the ground can be got ready; and for a succession, the sowing may be continued until June. In the South, of course February and March will be the time to sow, as they correspond with April and May of the North.

Mode of Sowing.—This must be varied according to the variety to be sown. Many of the most showy and beautiful annuals are very impatient of removal, and these must be sown where they are to remain and flower. Most of the tap-rooted annuals will not bear transplanting. Other annuals which may be transplanted, and some of which flower stronger for removal, may either be sown in the places where they are to bloom, or in prepared beds, whence they are to be transplanted to the flower-garden. In small gardens, undoubtedly the best way is to sow where they are to remain, thinning out the superfluous plants; this gives the least trouble. The seeds may be sown in rows or beds, or in masses or groups, in which latter mode we think annuals produce the best effect. Our plan has always been to mark out a circle a foot or more in diameter, and level the ground evenly and nicely with a rake; then, with the back of a trowel, press the surface firmly down; around the circle make a slight drill of the proper depth, in which the seeds are thinly sown, covering them lightly, and again pressing the earth upon the seeds with the back of the trowel.

Care should be exercised in covering the seeds. It is an error to cover too deep. No rule can be given in this respect, for while sweet Peas do best if sown three inches deep, Morning Glory seeds and others of that size, one inch, a quarter of an inch will be sufficient for such seeds as Balsam, Aster, Candytuft, etc.; and for smaller seeds, an eighth of an inch or less, according to the size of the seed.

It is not often that seeds planted early in the open ground need watering; but later they may require it, as when the seeds begin to swell, they are susceptible of injury from drought. A very good plan with very small seeds is to cover them with paper secured with pegs, being careful to remove it just as soon as the seeds are up. When the seedlings have made a few leaves, they should be thinned out. If they are kinds which will bear removal, they may be replanted in vacant spaces; and in doing this it is recommended to take advantage of cloudy weather, or towards evening, giving a light watering to settle the soil about them.

HALF-HARDY AND TENDER ANNUALS.

We have already remarked that half-hardy and tender annuals are those that require the aid of artificial heat to assist germination; but it should be remarked that this is not absolutely necessary if the sowing is deferred until the ground is warm. This is exemplified in the Portulaca, which sows itself, but the plants never appear above ground till June; and those who do not wish the trouble of sowing seed early should plant in open ground in May. But to gain time, and insure an early and abundant bloom, it is best to plant early, and assist the growth by a gentle artificial heat. Some of the most magnificent annuals are embraced in this class, of which the Aster, Zinnia, and Balsam are examples. The cheapest, most convenient, and simplest mode of doing this is the ordinary hot-bed of stable manure, which gives a gentle, bottom heat quite sufficient for any of this class. Its construction is simple, and generally understood by most owners of a garden; but for the benefit of those who do not know how to make a good hot-bed we give directions at the close of our remarks.

By the middle of May the scedlings will be ready for transferring to the beds or borders where they are to bloom; but before this is done, the plants should be "hardened off," as it is termed, in order to prepare them for the change. This is effected by gradually giving the plants more air, and when the weather is favorable, both day and night, removing the sashes wholly during the day. Much must be left to the judgment of the cultivator, the object being to prevent the plants from being injured by a too sudden exposure to the open air.

BIENNIALS AND PERENNIALS.

Biennials are those plants that generally do not flower until the second year, and after blooming, die. These include, however, many splendid species,—such as the Foxgloves, Canterbury Bells, Sweet Williams, Hollyhocks, etc. Perennials are plants that generally do not bloom until the second year, but continue to bloom for years in succession, and may be propagated, after once obtained, by division of the roots, growing more vigorously and flowering better if divided and replanted every three or four years.

The proper time for sowing the seeds is in April or May, in order to obtain a good strong growth the first year, and a greater abundance of flowers the second; but the sowings may be continued later. Whether the seeds are sown in beds or in the border, the young plants should be thinned out and afterwards transplanted, as directed for hardy annuals, only giving them more room, and encouraging a vigorous growth by hoeing, watering, etc.

SPECIAL SUGGESTIONS TO AMATEUR CULTIVATORS.

In addition to the preceding remarks, which are given as the results of our own practice for many years, and which, we think, are adequate for all general purposes, the following special directions are added for the guidance of 'amateurs in the treatment of many of the more choice and new flowers enumerated in our Catalogue:—

French and German Asters. — These justly admired and most beautiful annuals may be sown in pots, pans, or boxes, in a well-prepared soil, and placed in an exhausted hot-bed or cold frame, watering them gently till the plants are an inch high, when, after hardening off by gradual exposure to the air, they should be transplanted into the open ground in a light, rich soil, placing them in rows six inches apart. In the course of two or three weeks they will have become stout and stocky, and ready for replanting out where they are to flower.

Zinnias may be treated like the Aster. The double varieties are superb ornaments of the garden.

Epacrises, Heaths, Azaleas, and Rhododendrons should be planted in boxes or pans, well drained, and filled with light, very sandy loam, with a small quantity of peat. Make the earth firm, and give a thorough watering before sowing. Cover the surface with a little sand, upon which the seed should be thinly scattered, covering with the least possible quantity of fine sand. Place the pans or boxes in the greenhouse where they can be wholly shaded from the midday sun, and lightly dampen the surface when dry. The young plants make their appearance in three or four weeks; and when strong enough to handle, transplant into boxes, and gradually harden them off, so as to remove to frames or the open air.

Calceolaria, Cineraria, and Chinese Primrose Seed require the following treatment: -

The seeds of Calceolaria are so minute that they are liable to be destroyed by covering with soil. The seed should be sown in pots or pans, well drained, and over this a little rough turfy loam, filling to the surface with very fine, light, sifted mould mixed with silver sand; then water with a very fine rose, and immediately after sow the seed, no covering of soil being necessary. Place the pots in a cold frame or under a hand-glass, and cover with paper, to keep the seed from any exposure to the sun. If any watering becomes necessary, set the pots for a short time in a saucer of water. June, July, and August is the season to sow the seed. When the seedlings are strong enough, prick them off into pans of same soil as before, and keep them in a close situation. When sufficiently grown, pot singly into three-inch pots, and place them on shelves near the glass in the greenhouse.

Cinerarias require less care, although the same treatment with the seed will answer. If the plants are wanted to bloom in winter, the seed must be sown in April and May; and for spring flowers, in July and August.

Chinese Primrose Seed may be sown in March, April, May, June, and July, and should have a rich soil. Fill the pots to within half an inch of the top with a compost made of thoroughly rotted manure, loam, and a little sand; use no peat, or any soil liable to cake or turn green. Sow the seed thinly; press it gently into the soil, and cover very slightly with same compost. Place in a warm house or hot-bed. Seed will germinate in two to three weeks. When sufficiently strong, pot off into small pots, and place near the glass in a frame or greenhouse.

Acacias of all kinds should have scalding water poured over the seeds and be allowed to soak for twelve or twenty-four hours; they should then be planted in pots, in light, rich, sandy soil, covering one fourth of an inch deep, and placed in the hot-bed or greenhouse.

Globe Amaranth, Linum, and Cypress-Vine seeds should be soaked in tepid water for twelve hours to insure a quick germination.

Cyclamens should be sown in the greenhouse or hot-bed in pans of light, rich soil, well drained. Transplant singly into pots and keep them constantly growing.

Stocks of the winter-flowering varieties should be sown in May or June, and pricked off singly into small pots, shifting them as they require it and keeping them in cold frames as long as it can be safely done.

Canna-seeds have a hard, horny covering, and require to have the seed soaked in warm water for ten or twelve hours. Plant them in hot-bed or other warm place. Take up the roots before hard frosts.

Gloxinias and Achimenes require to be sown in pots in the greenhouse or a warm frame. The soil should be light and rich,—leaf-mould, loam, and sand.

Ferns are raised from the spores (or seeds) with a little care. Sow in pots, which should be half filled with a good drainage of crocks, and the remainder, to within an inch of the rim, with coarse, sandy peat or leaf-mold; make the surface smooth and cover with a thin layer of sand; on this sprinkle the spores. Set the pot in a pan of water in a warm, shady part of the greenhouse, and cover with a pane of glass.

THE CONSTRUCTION AND MANAGEMENT OF HOT-BEDS.

We have already alluded to the importance of a hot-bed for the successful growth of many of the half-hardy annuals. Though most of all kinds may be raised in a frame without bottom heat, yet this can only be done so late in the season, when the weather has become warm, that many are late in blooming. It is to obviate this that the hot-bed is recommended to all amateurs. It is so easily made, and at such slight expense, that it will well repay all who would secure an abundance of flowers early in the season.

Situation of the Bed.—This should be in a warm position, fully exposed to the sun, facing the east or south, and sheltered by a fence or hedge on the west or north. The location should, if possible, be light and dry, as in this case the bed can be sunk in the ground; but if damp or cold, it should be built upon the surface.

Making the Bed. - Manure fresh from the stable is best. This should be thoroughly shaken up with the fork, making it into a conical heap. In this state it should be allowed to remain three or four days, at the end of which time it should be turned over, shaking it up as before. At the end of another three or four days it will be ready to make up the bed. Lay out the ground twelve inches larger than the frame, and put down a stake at each corner. The frame may be of any size; but the most convenient is nine by six feet, which will take three lights three by six feet, the ordinary size, which can always be had ready made. Proceed to build up the bed to the height of two and a half feet, beating it firmly in the process of building, and keeping the surface level. When the bed is finished, put on the frame and lights. In a day or two add three or four inches of good, light, porous soil, spreading it evenly over the bed. If seeds are to be sown in the soil of the bed, two or three inches more soil should be added; but if in pots, no addition will be necessary. Shade during the day, and regulate the temperature by tilting the lights at the back both night and day and covering at night with mats. A thermometer placed in the bed will be the safest guide to the inexperienced. It should not rise above eighty degrees in the day nor sink below sixty degrees at night. The length of the frames is immaterial, but they should be twelve inches deep at the front and eighteen inches at the back. Cold frames are simply the hot-bed frame set upon a warm spot of ground, covering it at night to keep in the warmth accumulated during the day.

The special care and attention we bestow in the growth and selection of the choicest varieties of seeds, and the great pains we take to supply only new stock of the very best and most approved strains, reduce the chances of error almost to an impossibility; still, as a failure from causes entirely beyond our control might occur, we do not warrant seeds or crops.

The kind recommendation of our firm to any of your friends requiring Seeds, Bulbs, Plants, Trees, etc., is respectfully solicited. We shall be pleased to send Catalogues on receiving their Post-Office address.

SEEDS AND BULBS BY MAIL,

To all Parts of the United States, Free of Postage to Purchasers.

Seeds Free of Postage.—We send seeds by mail to any part of the United States at the Prices named in the Catalogue, postage paid, on receipt of the amount ordered. This convenient arrangement enables those who reside in the most distant parts of the country to obtain their supply of seeds with no more trouble or expense than our nearest neighbors. By simply enclosing an order with the amount, as directed below, by mail to our address, our customers will have no further expense or trouble than to call in a short time at their post-office, and receive the seeds, as we pay the postage on every package through to its destination.

Exceptions to this rule are when Grass Seed and other heavy and bulky seeds are ordered by the peck or bushel, or in cases especially noted in the Catalogue.

According to the present postal laws we can send seed to Canada and the British Provinces by Express or freight only.

HOW TO SEND MONEY.

ALL SUMS TO THE AMOUNT OF ONE DOLLAR AND UPWARDS MAY BE SENT AT OUR RISK, if forwarded

Post-office Money Orders to be obtained at nearly all the principal post-offices, and cost from ten to twenty-five cents. This is the best way, and perfectly safe.

Registered Letters.—When a Post-office Money Order cannot be had, enclose the money and register the letter, which can be done at every post-office, and will cost ten cents.

Bank Drafts on Boston or New York, which can be obtained at any bank for about twenty-five cents.

Money by Express, in amounts not less than five dollars.

The cost of sending us money as above we will pay on all orders amounting to two dollars and upwards, and it may be deducted from the amount of the order, or we will send seeds, as an equivalent, if so desired.

Sums less than one dollar may be sent at our risk without registering. When postage stamps are sent, be sure not to moisten them in the least.

When remittances are not made as above, we disclaim all responsibility.

SAFE ARRIVAL OF PACKAGES GUARANTEED.—We guarantee the safe arrival of all parcels and packages of seeds and bulbs when orders are accompanied with remittances as above directed.

Sometimes orders fail to reach us, and if after a reasonable time any of our customers fail to receive their seeds, they should inform us, and send a copy of their order.

NAME AND ADDRESS.—In sending an order please give your Name, Post-office, County, and State in full, as plain as possible; your name especially, written very distinctly. It often happens that we can read everything else in a letter better than the signature. Every year we receive many letters to which our friends forget to sign their names, which causes much trouble to us and anxiety to them. Please, therefore, be particular in all these respects.

N. B. Free by Express.—Under the present postal law we are compelled to pay sixteen cents per pound postage; and as, in many cases, we can send orders over two pounds' weight, by express, at less cost to us than by mail, customers will oblige by informing us whether, in such cases, it would be convenient for them to have orders sent by express instead of by mail, and giving us their nearest express office, and name of the express company.

This applies only to such seeds, bulbs, and other articles as we offer to send by mail at Catalogue prices.

COLLECTION OF FLOWER SEEDS

BY MAIL, FREE OF POSTAGE.

For the convenience of those who are unacquainted with the different classes and varieties of flowers, or who prefer to leave the selection to us, we offer the following collections, which we recommend as suited to the general taste. They contain a selection of the most popular and favorite kinds, and the best strains of double flowers, like the French Asters, Camellia-flowered Balsams, Fine Double Zinnias, etc. Each packet contains a mixture of the different colors of its species, affording a greater variety in color, at much less expense than when ordered in packets of separate colors.

The state of the s								
Collection A contains twenty-five varieties, most popular Annuals								
Collection B contains twelve varieties of extra fine Annuals, including beautiful French Asters,								
Double Camellia-flowered Balsam, German Stocks, Double Zinnia, etc	1.00							
Collection C contains twenty varieties of hardy Biennials and Perennials	1.00							
Collection D contains five packets of choice selected seeds of the finest Large Pansies, English								
Prize Hollyhocks, choice Verbenas, Carnations, and Prize Petunias	1.00							
Collection E contains fifty varieties of the best Annuals, Biennials, and Perennials	2,00							
Collection F contains one hundred varieties of Annuals, Biennials, and Perennials, including many								
new and desirable sorts	4.00							
Collection G contains 15 species and varieties of choice greenhouse-plant seeds	2.00							

These Collections are all of our own selection, and not subject to any discount from above prices. Pur chasers who prefer to make their own selections are referred to the following:—

CLUB RATES.

The wide distribution of our Seeds being a special object, we offer the following inducements to parties in any town or neighborhood, to club together and send their orders in one, by which many can avail themseves of our liberal premiums; also to individuals to enlarge their orders. These rates apply only to SEED IN PACKETS, Flower, Vegetable, etc., which, on receipt of the amount ordered, will be put up separately, and sent by mail Postage Paid, in a package to one address, or if desired, will be sent in separate pack ages to each individual of a club, if their names and post-offices are given.

Purchasers	remitting	\$1.00	may select	seeds in	n packets	at Catalogue	prices,	amounting to	\$1.25

SPECIAL COLLECTIONS

OF

Choice French and German Flower Seeds.

WE respectfully invite attention to the following collections, which are recommended to those who prefer separate colors or varieties of any particular class of flowers. Many of these collections have been put up expressly for us by the most celebrated flower-seed growers in Europe, while others have been selected from the choicest flowers of our own cultivation, and we do not hesitate to recommend them as equal in excellence to any that can be obtained. Our French Asters and Double Zinnias received the first prize at many of the exhibitions of the Massachusetts Horticultural Society.

592	PALAFOXIA Hookeriana. One of the finest of recent acquisitions; dwarf and branching; flowers bright rosy-crimson with a dark centre. An annual, and blooms throughout the summer	5
	PANSY (Heartsease, or Viola Tricolor). The Pansy, or Heartsease, is a general favorite and old acquaintance with every one who has anything to do with a flower-garden. It begins to open its modest but lively flowers as soon as the snow clears off in the spring, and continues to enliven the garden till snow comes again. The flowers are in the greatest perfection in May and June; the burning sun of summer is unfavorable for their greatest beauty, but in autumn they are fine again. The Pansy is properly a biennial, but can be perpetuated by division of the roots. Seed sown in August and September, with a slight protection in winter, make the best plants for spring bloom. Spring-sown plants bloom better during summer than the former, and improve in size and beauty after the greatest heat of sum-	
593	mer is over. Large English, extra choice from the finest prize collections	.50
594	International Prize, a superb French strain, comprising the beautiful varieties

ORNAMENTAL GRASSES,

SUITABLE FOR

MIXED FLOWER BORDERS, WINTER DECORATIONS, BOUQUETS, ETC.

THE Ornamental Grasses are graceful and highly interesting, and should have a place in every flowergarden. They produce a beautiful and pleasing contrast when interspersed with flowering plants. Some species - like the Brizas - are very fine for using with cut flowers in the composition of bouquets; and many of them are valuable for drying, and are often dyed with various brilliant colors, and mixed with the different kinds of dried flowers used for winter ornaments.

SUMMER FLOWERING BULBS.

GLADIOLUS.

SCARCELY anything need be said in praise of the Gladiolus. It is, perhaps, the most beautiful and desirable of all the summer flowering bulbs, and has become a general favorite, and exceedingly popular, wherever known. The flowers, which are produced in long spikes, are of almost every shade of color, from white to delicate blush and rose, carmine, crimson, and scarlet, many varieties being beautifully tinted and striped, spotted and diversified in the most interesting manner. The Gladiolus is of the easiest culture in any good garden soil, and may be planted any time from April to the middle of June. Set the bulbs four inches deep, and eight or ten inches apart. For a long succession of bloom, it is recommended to plant the bulbs at intervals of ten or twelve days. In fall, after frost, take up the bulbs, dry them thoroughly, and keep in a dry place away from frost during winter.

NEW HYBRID GLADIOLUS.
Lemoinei. Fine flowers, closely set on the spike, which is about one foot long, the upper petals of a creamy-white color, tinted with soft rose; lower ones deeply blotched with purplish crimson,

bordered with bright yellow, and salmon-tinted edge...... Each. Maria Lemoine. Long spike of well-expanded flowers, upper divisions of a rich cream color flushed with salmon lilac, the lower petals blotched with deep crimson, bordered with bright yellow, and feathered with dark violet..... Each.

Both of these new hybrid varieties are said to be perfectly hardy, and have created quite a sensation. They are entirely novel in the style and color of their flowers, and will, no doubt, originate an interesting new class of these very powular plants.

GLADIOLUS.

GENERAL COLLECTION.

· PR	ICE.
Agatha. Rose, shaded with lake and striped with carmine, with clear yellow spots; a novel shade of	
color	.15
Amalthee. Pure-white, violet-red, blotched lower petals, slightly tinged with lilac	.35
Angele. White, very long spike; showy	.15
Antonius. Scarlet cherry, slightly tinged with orange, flamed carmine and white, blotched	.10
Bertha Rabourdin. Pure white, with magnificent large, carmine stain	.20
Bijou. Bright orange-cherry, flamed with scarlet; fine	.15
Brenchleyensis. Bright vermilion-scarlet	.10
Calypso. Flesh color, striped with rose and blotched with carmine	.15
Celine. Rosy-white ground, striped or marbled with carmine	.15
Charles Dickens. Delicate rose, tinged with buff and striped with carmine	.25
Cherubini. White, flamed with carmine-violet	.15
Ciceron. Flower very large, of fine dark rose, tinged with violet-crimson, flamed with dark carmine;	
throat, white	.35
Comte de Morny. Dark cherry-red, blotched with white and striped with purple	.20
Duc de Malakoff. Orange-red, on yellowish-white ground; fine	.20
Fulton Vermilion. Velvet; very bright, spotted with purple; magnificent.	.15
Galathea. Blush white, with carmine blotch	.15
Goliath. Light red, striped and spotted with carmine; large flower.	.15
Horace. Long spike; brilliant fire-red, with white stains.	.25
Ida. White ground, slightly tinged with rose, flamed with carmine; lower petals light yellow	.15
Isis. Vermilion scarlet, with fine pure white blotch	.25
Jean d'Arc. White, very slightly tinged with rose, striped with purple	.20
Le Poussin. Light red, white ground, very large; white blotch on lower petals	.20
Lord Byron. Very brilliant scarlet, stained and ribbed with pure white; very showy plant	.15
Lord Raglan. Salmon-rose, with distinct stains of vermilion-red color	.20
Margaretta. White ground, slightly tinged with bright carmine	.20
Marie. Pure white, with deep carmine blotch; fine	.20
Meyerbeer. Brilliant scarlet, flamed with vermilion, red blotched	.20
Mr. Lebrun d'Albanc. Brilliant red, pure white blotched	.20
Napoleon III. Very bright scarlet-red, white striped in the centre of the division	.15
Nelly. White, blazed with carminate-rose, with a large stain of a dark carmine	.15
Neptune. Red, mottled and blotched with carmine; very beautiful	.15
Ophir. Dark yellow, purple blotched	.20
Oscar. Brilliant rosy lake, white blotch	-20
Othello. Light orange-red; very effective	.20
Penelope. White, slightly tinged with pink, lower petals yellow-tinted and striped with carmine	.15
Princess of Wales. White, flamed with carmine-rose, with deep carmine blotch	.10
Proserpine. Deep rose and crimson violet	.20
Rebecca. White, slightly mottled with lilac	.15
Reine Victoria. Pure white, stained with violet-carmine; very large	.25
Romulus. Large spike, flowers very brilliant blood-red, with large pure white stains on the superior	
divisions, and white lines on the inferior divisions; a very showy variety	.15
Spectabilis. Soft rose, margined cherry, and blotched with purple	.30
Stella. White, flamed with carmine	,10
Sultana. Bright rose and carmine	.75
Thalia. White, flamed and streaked with carmine; very fine	.20
Thana. White, named and streaked with carmine; very line Themis. Fine spike of delicate satin, rose-colored flowers, handsomely marked with light carmine	0
blotches; very beautiful.	.20
The Bride. The finest clear white variety.	.25
The Bride. Inc linest clear white variety.	.20
Thunberg. Cherry orange, pure white spots	.15
Van Dyck. Crimson amaranth, striped with white; very line	.20
Vulcan. Rich, velvety scarlet purple	.20
Zenobia. Bright rose, flamed with carmine	.15
Zenobia. Bright rose, named with carmine	"TU

GLADIOLUS IN COLLECTIONS.

To those who prefer not to make their own selections from the foregoing list, we offer the following Collections, which are all composed of the best-named varieties of each class, and embrace the most distinct shades of color peculiar to this beautiful and favorite flower:—

DOUBLE TUBEROSES.

The Tuberose is one of the most delightfully fragrant and beautiful of summer-flowering bulbs, throwing up tall spikes of double white flowers, two to three feet high, which remain in bloom a long period. The bulbs may be planted from February to May. When they are needed very early, they may be planted in the greenhouse or hot-bed in February or March, and for a succession of flowers, in April and May. In planting, remove the offsets, and place a single tuber in a pot four or five inches wide. Use good loam and leaf-mould, with good drainage. Start them slowly, in the hot-bed or forcing-pit, or later, in the house. Water slightly at first, and when the bulbs begin to grow, increase the quantity. Those started early should be kept in heat till May, when they may be shifted into six or seven inch pots. By the first of June plunge them in the garden, or transplant any not wanted to remain in pots. The 20th of May is as soon as the bulbs should to planted in the open ground.

Flowering Bulbs, 5c. each; \$.50 per dozen; \$4.00 per 100. Extra Large Bulbs, 10c. each; \$1.00 " \$6.00 "

NEW DOUBLE PEARL TUBEROSE.

This new variety is highly prized for the large size of its flowers, being double the size of the common kind, and finely imbricated like a rose; also for its dwarf habit, growing only eighteen inches to two feet in height; its short growth making it more desirable for growing in pots.

Flowering Bulbs, 5c. cach; \$.50 per dozen; \$4.00 per 100. Extra Large Bulbs, 10c. each; \$1.00 " \$6.00 "

Caladium Esculentum.

One of the most beatiful and striking of ornamental-foliaged plants in cultivation, either for culture in large pots or for planting out upon the lawn. It will grow in any good garden-soil, and is of the easiest culture. When of full size it stands about five feet high, with immense leaves, often three feet in length by two and a half in breadth, of a light-green color, beautifully veined, and variegated with dark-green. The roots should be preserved in dry sand in a cellar during winter, out of reach of frost. 25c. each; \$2.25 per dozen. Extra-sized bulbs, 40c.; \$4.50 per dozen.

CALADIUM BATAVIENSIS.

Similar in growth to C. esculentum, but with darker, rich green leaves and dark-red leaf stems. Bulbs, 25 and 50 cents each.

AMARYLLIS FORMOSISSIMA, OR JACOBEAN LILY.

This is a beautiful summer-flowering bulb. It generally produces two stems, one after the other, each bearing a large, lily-like flower of the richest crimson-velvet color, its golden stamens drooping gracefully over the lower petals, giving it additional brilliancy. Plant the bulbs early in May, in rich, mellow soil. In autumn take them up, and keep dry and secure from frost. They bloom in June. Price 25 cents each. Per doz., \$2.50.

TIGRIDIAS (TIGER FLOWERS).

Tigridia Pavonia.

Mexican bulbs, growing one to two feet high. They produce their gorgeous tulip-shaped flowers of scarlet, yellow, or orange colors, most exquisitely spotted with dark crimson on their inner petals, daily from July to October; of easiest culture, only requiring to be planted in May, in rich deep soil.

	1 121	014.
Grandiflora. A new variety; scarlet, orange spotted	.15	\$1.50
Conchiflora. Golden yellow, crimson spotted.	.10	1.00

Fine mixed varieties	8	-75

CANNAS.

For a grand and fine effect in the floral garden no foliage plants can surpass the Cannas. Whether grown in masses or planted here and there singly among flowering plants, their stately growth and massive foliage of various shades, and their brilliant flowers, combine to render them highly effective and ornamental.

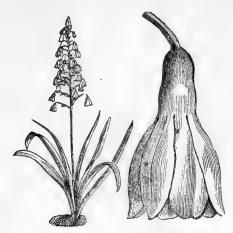

Gigantea.	Immense reddish foliage, shaded and strip	ed with darker lines. 5 ft	
Nigricans.	Splendid, tall-growing variety, with rich	h, dark, coppery-red foliage, an	d dark-scarlet
flowers.	8 ft		
Ne Plus U	Itra. Superb variety; broad, copper-color	red foliage, finely shaded. 4 ft	
Rendatleri	· Long, dark-purplish foliage, and very l	arge orange-scarlet flowers. 5	ft
Depute He	enon. Fine, long, green foliage, shaded w	ith a bluish bloom; flowers brigh	t orange. 5 ft25
Mixed in a	reat variety		Per doz., \$2.00 .20

MADEIRA, OR MIGNONETTE VINE.

The Madeira Vine is a popular and favorite tuberous-rooted climbing plant, with dense and beautiful shining foliage, and of very rapid growth, twining on strings to a great height, or forming garlands in any fanciful form. In the autumn it is covered with racemes of feathery-white flowers, sweet and fragrant as Mignonette. It will grow anywhere, but does best in a warm, sheltered, sunny location. It is also a very pretty plant for training around the windows in the house. Tubers, 10 cents each; 60 cents per dozen.

BOCONIA JAPONICA.

A handsome, hardy, herbaceous plant from Japan, forming dense bushes five to six feet in height, which during the month of August are covered with beautiful pyramidal spikes of white flowers. As a single specimen on the lawn, or centre of beds, it is most effective. Price, 25 cents each; \$2.00 per dozen.

HYACINTHUS CANDICANS.

A Hyacinth blooming in summer may be considered a great novelty. This new species is a bulbous plant, and produces a flower-stalk three feet in height, terminating in a spike of twenty or more large, beautiful, pure-white, bell-shaped flowers, in July and August. It is of easiest culture, and has been known to stand the winter unharmed by frost, but we have classed it with spring bulbs, planting in spring and giving it the same treatment as Gladiolus. Price, 15 cents each; \$1.25 per dozen.

LATHYRUS TUBEROSA.

A hardy, climbing, tuberous-rooted species, with numerous clusters of handsome, bright-pink flowers, which appear during the months of June and July. Is well adapted for covering light trellises or planting in rustic baskets and vases. Price, \$1.50 per dozen; 15 cents each.

OXALIS LASIANDRA.

This is one of the prettiest of the few species of summer-flowering Oxalis; grows about one foot high; of bushy form, with handsome foliage. For a long season it continues to display in profusion its bright, purplishpink flowers, which on bright sunny days are brilliant and beautiful. Price of bulbs per dozen, 50 cents.

TRITOMA UVARIA.

One of the finest summer and autumn flowering, half-bardy, herbaceous plants, with very brilliant orange, scarlet, sceptre-like flower-heads, three to four feet in height.

Are admirably adapted for bedding out, as the numerous terminal flame-colored blossoms form a stately distant or mediate effect. They thrive in any good garden soil. On approach of winter the plants should be lifted, placed in a frame or cellar, and replanted out again in spring. In some localities they have stood the winter in the open ground by protecting with straw and leaves. Price, \$2.50 per dozen; 25 cents each.

VALLOTA PURPUREA.

A splendid bulb, somewhat resembling an Amaryllis. It blooms in August, throwing up its strong stems about one foot high, each with from five to eight brilliant-scarlet, lily-like flowers; very ornamental in pots and vases, or for bedding out in summer. Price, 50 cents each.

ZEPHYRANTHUS ROSEA.

This is a very fine summer-blooming bulb for planting in spring. The flowers, which are in the form of a lily, are of a beautiful rose color, and appear in succession. Plant the bulbs in May, take them up before frost in autumn, and keep over winter in a dry place. Price 15 cents each; \$1.50 per dozen.

PLANTS OF HARDY CACTUS.

Opuntia Rafinesquiana Robusta. Flowers very large; bright yellow, with red centre. Opuntia Missouriensis. Flowers ye low; plant covered with small, thread-like spines.

Opuntia Speciosa. Flowers golden; ellow; plant covered with long, white spines.

Price, 25 cents each; 2.50 per dozen.

BY WEIGHT. CHOICE FLOWER

We offer the following select list of Flower Seeds by weight, which includes the most popular varieties grown for bedding, border, or edging purposes. All varieties named in this list, except Sweet Peas by the pound, will be mailed free, at prices quoted below, but no premium allowed. For general list of Flower Seeds, see page 9; for Novelties, pages i and v.

ILLUSTRATED GUIDE AND SEED CATALOGUE.

VEGETABLE SEEDS.

To this department of our Catalegue we have always given our most careful attention. Much progress has been made in improving our Vegetables by careful selections of Seed Stock and the introduction of new and more profuble sorts for market and family use. Many of the most valuable varieties we offer, originated in this vicinity among the best growers of Vegetables for the Boston Markets, affording us the opportunity of disseminating these kinds in their greatest purity, and enabling us to offer our customers a superior stock of Home Grown Seeds. Such kinds as cannot be successfully matured in this latitude we obtain from the most reliable growers of seeds in more favored sections of this country, and a few choice standard varieties we import from the best sources in Europe. We test our seeds before selling them, so that our customers can rely on their good-growing qualities.

Prices are quoted by the Packet, Ounce, Quarter Pound, and Pound, Quart (Pint at Quart rate), and Peck, at Store, or delivered to Express here; also Rates by Mail, postage paid. Four quarts sold at peck rate, half pound at pound rate; less than four ounces, at ounce rate. For Seeds in large quantities, special prices given on application.

ALL SEEDS AT OUNCE AND PACKET PRICE SENT BY MAIL, POSTAGE PAID.

The above collections are not subject to any discount.

GRASS SEEDS.

PREPARATION AND MANAGEMENT OF LAWNS.

A good, close, velvety lawn is one of the most ornamental and pleasing features connected with a rural home. To obtain this desirable object, the ground should be thoroughly prepared before the seed is sown. In the first place, the surface should be brought to the desired grade; if knolls are to be removed, the subsoil below should also be removed and replaced with loam, so as to have as near as possible a uniform depth of good soil throughout. When the grading is finished, the ground should be well manured and ploughed or deeply dug, after which a heavy harrow should be applied until the surface is thoroughly fine and mellow. All stones, roots, etc., should be removed, and the ground raked off, so that the surface may present a perfectly smooth appearance previous to seeding. After sowing as evenly as possible, rake in the seed, or if the lawn is of great extent use a light harrow, and roll the ground with a heavy roller. When the grass has grown to the height of two or three inches, it should be cut with a scythe, and recut every ten or twelve days afterwards. The mowing machine is greatly preferable to the scythe after the turf has become comparatively firm, and any lawn is greatly improved by the frequent use of a good mower. To secure a firm and elastic turf, the selection of proper grass seeds is a most important matter. To this we have given our particular attention, and we have yet to learn of the first instance where the mixture of seed we offer has failed to give entire satisfaction when the ground was suitably prepared. It is composed of those varieties of natural grasses which are hardy, and adapted to produce a permanent and fine turf. We test the growing qualities of each variety before the mixture is made, so that we recommend it with entire confidence. The quantity required per acre is from three to four bushels.

For all lawns we recommend a very light scattering of seed, two or three times, at intervals, during the season of growth; and when this is done, it should be immediately after the grass is cut, rolling the Lawn at same time if convenient. This will not only prevent the occurrence of bare spots, but also preserve a general freshness and greatly improve the firmness and elasticity of the turf. We also advise an annual dressing of manure, either in early spring or in autumn.

For Lawns requiring improvement it is only necessary to sow about one bushel of seed per acre, either in spring or autumn. Before doing this, rake the ground well with a short-toothed steel rake, then sow the seed evenly, and roll the whole carefully.

We have only space to append the following testimonials, from the large number received, as to the value of our Lawn Grass Seed:—

OFFICE OF SUPERINTENDENT OF COMMON AND SQUARES, CITY HALL, BOSTON.

MESSES. HOVEY & Co.:

Gentlemen, — Permit me to give my testimony to the excellence of your Lawn Grass Seed, that has proved so successful and satisfactory on the public grounds during the past five years.

WILLIAM DOOGUE, Supt.

MESSRS. HOVEY & Co.:

Gentlemen, — I am happy to say the Lawn I have made here is a great success. The seed you sent me has proved entirely satisfactory. I have never known so good a Lawn made in so short a time.

Yours truly, S. E. LYON, BAR HARBOR, ME.

THE PATENT CHAMPION FORCE PUMP.

Price, \$6,50

This is the most valuable and efficient portable Pump for garden and other purposes ever invented. It will throw six gallons of water per minute in a steady stream thirty to forty feet, or, with sprinkler attached, spread the water in a fine spray; and is admirably adapted for use as a syringe, or for applying liquids to trees, plants, and shrubs, for the destruction of insects; also very useful for washing windows, carriages, etc., and of great value in case of fire, being a complete and perfect hand-apparatus for throwing water. It is made of brass, very strong, light, and durable; simple in construction, and not liable to get out of order. It was awarded the highest premium (a silver medal) at the Mechanics' Fair in Boston.

Excelsior Weeder.

Noyes' Hand Weeder.

Excelsior Weeder. A very handy and almost an indispensable implement in the garden for loosening the soil among plants and destroying weeds with great facility. It is about nine inches long, made very strong and light; easy to handle. Price, 20 cents each; by mail, 25 cents.

Noyes' Hand Weeder. This is one of the simplest and best implements ever invented for assisting where hand-weeding is required, and exceedingly useful among all kinds of plants. Its lightness, form, and the manner in which its cutting edges are presented, render it easy to handle, and very efficient in killing weeds with great rapidity. Price, 30 cents each; by mail, 35 cents.

FIREFLY WHEEL HOE AND PLOW.

There are thousands of gardens that are well kept only by the frequent bestowal of hard labor, valuable time, and close attention. The Firefly Hand Hoe and Plow changes this tiresome task into one of comparative ease and pleasure, and at the same time enables the user to complete his work far better and in one sixth the usual time. With it, the furrows for peas, beans, corn, potatoes, manure, etc., can be opened and afterwards covered neatly. Price, \$3.00.

THE PHILADELPHIA LAWN MOWER.

This LAWN Mower, which has now been tested for five years, has proved its superiority over all others, and has become the general favorite. It is by far the lightest running and easiest handled machine made, does its work perfectly, and is adapted for every variety of surface, also for mowing borders, banks, and terraces. At the six months' trial at the great Centennial Exhibition it proved not only the best but also received the highest award over all competing LAWN MOWERS. Every machine is warranted to give satisfaction.

Prices. — 10-inch cut, \$7.75; 12-inch cut, \$9.00; 14-inch cut, \$10.50. 16-inch cut, \$13.50; 18-inch cut, \$15.00; 20-inch cut, \$16.50

GUY'S GERMAN PLANT FOOD.

This is one of the best Fertilizers ever discovered, and is unrivalled as an invigorator for House Plants of all kinds, Bulbs, Window Gardens, Ferneries; also, for choice garden plants, fruit, flowers, and all kinds of vegetables. Price, 10 and 25 cents per box; by mail, 15 and 40 cents.

DARLING'S FLOWER GROWER.

This most excellent Fertilizer is specially prepared for the successful growth of all Flowering Plants in the house or greenhouse. It contains all the elements of fertility required for a healthy, vigorous growth and bloom, and adding greatly to the brilliancy of the flowers. Price, 25 cents per package; by mail, 50 cents.

VERBENA BASKETS.

Having made arrangements with the manufacturer, we can offer Verbena Baskets to florists at \$2.00 per hundred; \$18.00 per thousand.

MORRILL'S GRUB AND CANKER-WORM EXTERMINATOR.

A great protection for fruit and ornamental trees from the ravage of the canker-worm, is applied with brush in the same manner as tar, but is much more effective. 5 lb. cans, 60 cents; 10 lb., \$1.00, 25 lb. pails, \$2.50; 50 lb. kegs, \$5.00.

WISS' AMERICAN HAND PRUNING SHEARS.

These are very efficient instruments, and leave the branch which has been cut as smooth as if a knife had been used. Price, 71 inches, \$1.50; 8 inches, \$1.75; 9 inches, \$2.25.

WATERS' TREE PRUNERS.

These Pole Pruners enable a person standing on the ground to trim and prune all moderate-sized trees, and by using steps, reach branches on larger trees more conveniently and with less labor than in any other manner.

PLANT STAKES.

Round Stakes, neatly turned, painted green, light and tasty, suitable for plants in pots, also for Carnations, Gladiolus, and various other plants, in the open ground.

VINE AND PLANT PROTECTORS.

The great value of these simple and cheap articles for the protection of Cucumber, Squash, Melon, and other young plants, from the ravages of bugs and all other kinds of insects, has been practically proved by eleven years' use. They not only afford a sure protection from insects, but also from injury by high winds, storms, and even light frosts, while they admit the light, sun, and air freely to the plants, thus promoting a healthy and vigorous growth, and accelerating their early maturity.

The square Protectors spread nineteen inches; the round ones are sixteen and eighteen inches in diameter; and when not in use, both so fold up as to require but little room. With care they will last many years.

Price for square Protectors.

\$1.50 per doz.

TROWBRIDGE'S GRAFTING-WAX.

Highly recommended as the best in use. Neatly put up in one-lb. packages, at 30 cents; half-lb. packages, at 15 cents; one fourth lb. packages, 10 cents; by mail, 16 cents per pound extra.

PLANT AND CARDEN TRELLISES.

The cultivation of Plants, Shrubs, Vines, etc., has become so extensive that a large demand has been created for light and tasteful frames or trellises upon which to train them. To supply this demand, which has very much increased since we first gave it our attention, we are constantly improving and increasing our facilities for manufacturing, and in this circular present to the public designs correctly representing some of the styles now made and sold by us. Our trellises are in all cases made of reeds instead of wire. They retain their shape and form better; and, while they are much lighter, they are equally durable. All our trellises painted green, unless otherwise ordered.

PAINTED WOOD LABELS.

A new and valuable improvement in Wood Labels; the entire Label being thoroughly saturated with a very thin covering of paint, causing them to write very smooth, leaving a deep-black and permanent impression from an ordinary pencil. This preparation also preserves from decay the part inserted in the soil; a valuable and economical consideration.

FERTILIZERS.

DARLING'S ANIMAL FERTILIZER.

This excellent and valuable Fertilizer is made of the following materials In each ton, 700 pounds Fine Bone, 700 pounds Animal Dust, 400 pounds Dried Blood, 200 pounds Muriate of Potash; from which it will at once be seen that it is rich in Ammonia, Phosphoric Acid, and Potash, the three principal fertilizing elements in all plant food. This Fertilizer is adapted for all crops, has given the greatest satisfaction, and is very highly recommended by all who have used it to be the very best Fertilizer in the market.

Price per 50-pound bag, \$1.50; 100-pound bag, \$2.50; 200-pound bag, \$5; per ton, \$40.

DARLING'S PURE FINE BONE.

This is acknowledged to be one of the best and most lasting fertilizers, and is suited to all kinds of crops. It is highly beneficial to grass lands, as it abounds more than anything else in phosphate, the most necessary element to restore fertility to the soil. Grain and vegetable crops are all benefited, and it is especially valuable for strawberries, grape-vines, small fruits, fruit trees, etc.

Price in barrels, \$40 per ton; single barrels, 2 1-2 cents per pound.

PERUVIAN GUANO.

From the large amount of ammonia and phosphate contained in this Guano, it is, without doubt, one of the most efficient, powerful, and valuable fertilizers known. It has now been in use for many years, and its value is generally acknowledged. The quantity used per acre is from 300 to 400 pounds.

Per pound, 10c.; 25 pounds, \$1.50; 50 pounds, \$2.50; per bag of 100 pounds, \$4.

BOWKER'S LAWN DRESSING.

This Lawn Dressing is prepared from chemical ingredients, and is so compounded as to contain all the plant food required by lawn grass. It is odoriess and clean to handle, and easily applied by simply sowing it broadcast over the surface, and within a short time after application it will produce a luxuriant growth of grass of a rich green color, which will last during the entire season. The cost of applying this Dressing is a mere trifle compared with stable manure, while it is far superior, clean, and is free from seed of noxious weeds so liable to be introduced, and which are the pest of many lawns. 400 to 600 pounds is a liberal dressing for an acre.

Trial bags for 1,000 square feet, \$0.50; 50-pound bags for 5,000 square feet, \$1.75.

" " 2,500 " " 1,00; 100 " " " 1-4 acre, \$3.00.

DARLING'S LAWN DRESSING.

This is prepared of the very best materials, especially for grass, and has no equal in keeping lawns fresh and green from early spring until late in autumn, and promoting a vigorous growth throughout the season.

Price 50-pound bag, \$1.75; 100-pound bag, \$3.00.

BOWKER'S GARDEN FERTILIZER.

This is made for a general kitchen-garden manure, to be used by those who have a small garden planted to various garden crops, and want some kind of dressing which is inexpensive and easily applied. This may be used on all garden crops, vegetables, small fruits, etc., in place of stable dung, and will be found much cheaper and more easily applied. It is also free from weed seeds,—an important consideration,—and will produce as large a growth as stable manure, earlier, and of better quality. It has very jittle odor, clean to handle, and the directions for applying are very simple. Every one who has a garden should give it a trial.

Trial bags for 600 square feet, \$1.00; trial bags for 1,200 square feet, \$1.75; 100 pounds for 2,500 square feet, \$3.00.

EARLE'S HORSEFOOT GUANO.

This is a complete manure. It has no superior for top-dressing for grass or for lawns, and may be applied at any time. It is adapted to all soils and every crop. Its constituents contain all the functions of nitrogen, potash, phosphoric acid, and other soluble agents, and on account of its low cost and high manurial value, it will be found invaluable to farmers generally, gardeners and florists.

Dear Sirs. — This is to certify that I have used your Fertilizer with wonderful success. I find it the best thing I ever used for the growth of various kinds of vegetables.

JOSEPH M. EDWARDS.

Gentlemen, — Most of my neighbors have used your Fertilizer, and say they shall want more in the spring, it having given such splendid satisfaction.

Yours truly,

N. B. SNOW.

In barrels, 2 cts. per pound; per ton, \$35.
